SAMPOERNA UNIVERSITY

Sampoerna
University

Catalog

2024 - 2025

In collaboration with:

**KEISER
UNIVERSITY**

The background of the slide features a blurred image of a laptop keyboard. Overlaid on this are several semi-transparent, stylized icons of documents or folders, each containing horizontal lines representing text. These icons are arranged in a cluster on the left side of the slide. The entire image is covered by a blue-to-green gradient overlay.

Fall 2024 Edition

This catalog remains in effect
until the next edition is published.

The background of the entire page is a dark, blue-tinted photograph of a large, modern university building at night. The building has many lit windows, and the name 'SAMPOERNA UNIVERSITY' is visible in large letters on its upper facade. The sky is dark, and some city lights are visible in the distance on the left.

Welcome to Sampoerna University

Welcome to Sampoerna University.

We would like to congratulate each of you, our students, for your achievement in becoming a member of the Sampoerna University community.

Sampoerna University will provide you with an international education as you study the discipline of your choice. We have established collaborations with overseas universities to ensure that you will have a pathway to your future with international recognition. Our campus is the ideal place for developing and achieving your intellectual potential.

You will follow the learning process in different study programs in a broad range of subjects. However, the variety of these subjects should not segregate you from your fellow students undertaking other study programs. The interdisciplinary courses and dialogue between all fields of study are at the core of our curriculum. History shows that interdisciplinary learning results in major creative and scientific breakthroughs in the world. Additionally, you will become more adept at responding to the multidimensional problems that occur in the real world.

As the future of Indonesia lies in your hands, we hope that you will use your time here at Sampoerna University to gain the knowledge and skills required when you enter the professional world. It is a world where you will have to compete in the labor force in all the ASEAN countries and beyond.

In addition to knowledge, we hope that you will develop comprehensive social skills and moral values that will empower you to make meaningful contributions to your community. Social competencies include empathy and awareness of other people, ability to listen to and understand disparate views, as well as to communicate across social differences. With these social competencies, we are confident that our students can work as a team, assume constructive roles in the community, and become wise and caring human beings.

Have a great time as you experience the journey that will lead you to become a successful person intellectually, socially, and morally. Good luck with your studies.

SAMPOERNA UNIVERSITY AT A GLANCE

Sampoerna University is Indonesia's premier international university. It is the only one in Indonesia that offers all of its academic programs in English and requires every student to complete an American-style general education program. Our small classes and world-class facilities provide the perfect environment for students to succeed.

Vision

Sampoerna University aspires to foster future leaders with strong moral character and internationally competitive skills sets, enabling them to actively participate in building a more prosperous, equitable, respected, and globally competitive Indonesia.

Mission

Sampoerna University aims to provide students affordable access to education that meets the highest international standards. Sampoerna University offers a curriculum unique in Indonesia built around an American general education core, successfully preparing students for credential completion at Sampoerna University or for recognized transfer abroad. We also provide a full spectrum of co-curricular and pre-professional opportunities that ensure student success, preparing leaders for a global society.

Core Principles

The following core principles guide SU in delivering these keyvalue propositions:

- » **English Language Proficiency** as the key enabler and connector for international education.
- » **Character development** as the nurturing of self-confidence through an affirming and engaging educational experience.
- » **Science and Technology** as key instruments for personal and national advancement.
- » Developing **Leadership** potential as an integral part of education.
- » Building an **Entrepreneurial Spirit** through industry collaborations that provide a stimulating learning environment.
- » Cultivating a sense of **Social Responsibility** as a key part of our national education agenda.
- » **Inclusion and Diversity** – promoting secularity and tolerance to foster greater local and international ties.
- » Tangible and ongoing commitment from the family and community to ensure **student success**.
- » Access to **Financial Assistance** and student support tools for those in need.
- » **Collaboration** with leading international institutions to expand educational options for Indonesians.

Statement of Non-discrimination

Sampoerna University is committed to fostering a welcoming, affirming culture of respect and inclusion, empowering and engaging all students, faculty, and staff. The University demonstrates this commitment by integrating diversity and inclusive excellence into its organizational processes, structures, and practices. SU affirms its commitment to recruit, support, and retain a diverse student, faculty, and staff community that upholds the principles of Indonesia's Pancasila and the spirit of non-discrimination as defined by the United States' Equal Opportunity Commission.

Accreditation

Sampoerna University (Universitas Sampoerna) was established by virtue of the Decision of the Minister of Education and Culture of the Republic of Indonesia Number 66/E/O/2013 dated March 15, 2013 juncto Decision of the Minister of Research, Technology and Higher Education of the Republic of Indonesia Number 122/KPT/I/2016 dated March 10, 2016, as a higher education institution dedicated to the social transformation of Indonesia through education. SU was established by the Putera Sampoerna Foundation, and initially was licensed as a higher education institution under the name “Universitas Siswa Bangsa Internasional.”

Partner institutions in the U.S. are fully accredited by their respective regional accrediting bodies, and credits earned at SU and articulated by partners may be transcribed by the partner institution.

Sampoerna University Leadership

POSITION	NAME	CREDENTIAL
President of SU	Dr. Marshall Schott	Ph.D., History, Louisiana State University, USA
Rector of SU	Drs. Wahdi Salasi April Yudhi	Ph.D., Business and Management, LaTrobe University, Australia
Vice Rector for Academic Affairs	Dr. Soepriyatna	Ph.D., English Applied Linguistics, from Universitas Katolik Indonesia Atma Jaya, Indonesia
Vice Rector for International Relations	Dr. Lauren E. Clarke	Ed.D., International Education Policy, University of Massachusetts Amherst, USA
Vice Rector for Administration, Resources Management & Operations	Endriyani Widyastuti	Master of Science, Economic Planning and Development Policy, University of Indonesia
Vice Rector for Student Success	Erik Krauss	Master of Professional Studies, Communication, Cornell University, USA
Vice Rector for Government Affairs	Elan Merdy	MBA, De La Salle University, the Philippines
Vice Rector for Enrollment Services	Lorensia Soegiarto	M.B.A., Johnson & Wales University, USA
Dean, Faculty of Education	Dr. Soepriyatna (Interim)	Ph.D., English Applied Linguistics, from Universitas Katolik Indonesia Atma Jaya, Indonesia
Dean, Faculty of Business	Dr. Wahyoe Soedarmono	Ph.D. in Money, Finance and Banking, Universite de Limoges, France, 2011
Dean, Faculty of Engineering & Technology	Dr. Surya Liman	Ph.D., Industrial Engineering, University of Florida, USA
Dean, Faculty of Arts and Science	Dr. Ade Iva Murti, M.Si	

A large, modern building with a curved facade and many windows, identified as Sampoerna University. The name 'SAMPOERNA UNIVERSITY' is visible on the upper part of the building.

GENERAL EDUCATION: THE SAMPOERNA UNIVERSITY CORE

A group of four students (three men and one woman) are standing in front of a large window, looking out at a city skyline. One man is holding a tablet and gesturing with his hand.

GENERAL EDUCATION: THE SAMPOERNA UNIVERSITY CORE

The General Education courses provide SU students with a multi-faceted and interdisciplinary education framework that include cross-and-interdisciplinary content. The General Education course requirements include Communications, Humanities, Social and Behavioral Sciences, Natural Sciences / Wellness, and Mathematics. The General Education framework is benchmarked to the traditional American Higher education curriculum and it is contextualized to meet Indonesian requirements for higher education. It also encompasses the core institutional values and traits of Sampoerna University, which has established six University level competencies, based on the VALUE rubrics developed by the Association of American Colleges & Universities that form the foundation of the general education and core courses.

Core Competencies

Critical Thinking

- Explain issues/problems
- Select and use information to investigate issues/problems
- Analyze and interpret relevant information
- Evaluate information to determine potential conclusions
- Generate well-reasoned conclusions

Critical Thinking

- Write clearly and coherently
- Speak and listen interactively

Ethical Reasoning

- Recognize ethical issues
- Understand different ethical perspectives or concepts
- Apply ethical perspectives or concepts
- Evaluate different ethical perspectives or concepts

Global Learning

- Develop global self-awareness
- Demonstrate an understanding of different perspectives
- Demonstrate an appreciation to cultural diversity
- Recognize personal and social responsibility
- Understand global systems
- Apply knowledge to contemporary global contexts

Information Literacy

- Determine the extent of information needed
- Access the needed information
- Evaluate information and its sources critically
- Use information effectively to accomplish a specific purpose
- Access and use information ethically and legally

Quantitative Literacy

- Explain information presented in mathematical forms (e.g., equations, graphs, diagrams, tables, words)
- Convert relevant information into various mathematical forms (e.g., equations, graphs, diagrams, tables, words)
- Carry out mathematical calculation
- Make judgments and draw appropriate conclusions based on the quantitative analysis of data, while recognizing the limits of such analysis
- Make and evaluate important assumptions in estimation, modeling, and data analysis
- Express quantitative evidence in support of the argument or purpose of the work (in terms of what evidence is used and how it is formatted, presented, and contextualized)

Distribution of the Core*

Major and Concentration Requirements

A major at Sampoerna University consists of a minimum of twenty-four (24) advanced semester credit hours in addition to the general education core curriculum and any required prerequisite courses. All prerequisite courses for the advanced courses must be met.

A concentration represents a focused area of study within a specific academic major. All courses in the concentration count toward fulfilling the major requirement. The number of credits for each concentration varies but must be no fewer than nine (9). Concentrations will only be noted on the transcript after completion of the degree.

**plus national culture and civics classes required by the Ministry of Education and Culture*

Senior Capstone Experience

During the senior year of study, each baccalaureate candidate must undertake an academic capstone experience which carries credit and is required for graduation. This capstone experience may be in the form of a project thesis, or course which will synthesize materials incorporated within a major, demonstrate communicative proficiency about the major, and indicate a high level of critical thinking within the major.

Degree Pathways

- Psychology

FACULTIES

FACULTIES

Mechanical Engineering

Mechanical engineering plays a critical role in solving the world’s grand challenges by producing sustainable energy, providing a safe environment and clean water, building safe and efficient transportation systems, designing new means of energy conversion and storage, and improving mechanical/electrical systems in homes and buildings. In the era of Industry Revolution 4.0, emerging high technology fields of additive manufacturing, advanced robotics, and internet of things (IoT) are examples of areas where mechanical engineering plays a vital role. Furthermore, established areas of mechanical engineering such as design, manufacturing, automation, and control are essential elements to devising largescale complex systems that drive the global economy. Mechanical engineers carry with them an ability to solve engineering problems, to create and design electro-mechanical system from the known to the unknown, in a logical and reproducible manner, thus allowing for the creation of leading-edge innovations in any sector.

Mechanical Engineering Degree Plan Curriculum Structure

YEAR 1	YEAR 2	YEAR 3	YEAR 4
General Education Courses		ME Core Courses	Technical Electives
			Internship
ME Foundation Courses			Seminar
			Senior Capstone

Laboratories

NO.	NAME	UNIT
1	Materials Science and Engineering Lab	1
2	Fluid Mechanics and Heat Transfers Lab	1
3	Instrumentation and Measurement Lab	1
4	Thermodynamics Lab	1
5	Machine Design Lab	1
6	Integrated Manufacturing Lab	1
7	Engineering Drawing and Drafting Lab	1
8	Mechatronics and Control Lab	1
9	Internet of Things Lab	1
10	Vehicle Dynamics Lab	1

Program Educational Objectives:

1. To have the abilities of analyzing and designing mechanical systems and solving complex engineering problems.
2. To have moral integrity, ethics, teamwork, and leadership.
3. To conduct lifelong learning to nourish creativity and innovation.

Program Learning Outcomes

By graduation, students in the Mechanical Engineering program are expected to attain the following Program Learning Outcomes:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, societal, and cultural contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze, and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Degrees offered:

Sarjana Teknik

Equivalent to a BS in Mechanical Engineering
(Note: Students' credits at SU may be recognized by University of Arizona to earn a University of Arizona's degree if the credits meet their graduation requirements. Students interested in credit recognition program should consult with an advisor.)

Industrial Engineering

Industrial engineers design, develop, improve, and manage efficient systems. Industrial engineering at Sampoerna University encompasses the analysis, development, improvement, and implementation of integrated processes and their components, including materials, equipment, information, energy, people, money, and time. Industrial engineers figure out how to do things better. Industrial engineering combines engineering, business, and communications and builds upon knowledge of computer science, math, production management, process control, and human behavior. Industrial engineers have the technical training and understanding of people to make improvements in efficiency and quality in any setting.

They are prepared to work in almost any industry technology, healthcare, telecommunications, manufacturing, and government. No matter what career you pursue, an industrial engineering degree from Sampoerna University will ensure that you are equipped to make a positive impact.

Industrial Engineering Degree Plan

Curriculum Structure

YEAR 1	YEAR 2	YEAR 3	YEAR 4
General Education Courses		IE Core Courses	Technical Electives
			Internship
IE Foundation Courses	Seminar		
	Senior Capstone		

Laboratories

NO.	NAME	UNIT
1	STEAM Lab	1
2	Physics Lab	1
3	Wet (Biology & Chemistry) Lab	1
4	Material Science & Engineering Lab	1
5	Human Factors and Ergonomics Lab	1
6	Integrated Manufacturing Lab	1
7	Smart Production & Supply Chain Lab	1
8	Internet of Things (IoT) Lab	1
9	Computer Lab	4

Program Educational Objectives:

1. To produce high quality Industrial Engineering graduates which have high competitiveness to become leaders upholding ethics and integrity.
2. To produce Industrial Engineering graduates who have international insights and are able to communicate and compete internationally.

3. To produce applied research and scientific work which contribute to the development of industrial engineering knowledge, science and technology, business, and academic society nationally, regionally, and internationally.
4. To produce Industrial Engineering graduates who have responsibility in the development of the national economy to improve life by the program of society service.

Student Learning Outcomes

By graduation, students in the Industrial Engineering program are expected to attain the following Student Learning Outcomes:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze, and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Degrees offered:

Sarjana Teknik

Equivalent to a BS in Industrial Engineering
(Note: Students' credits at SU may be recognized by University of Arizona to earn a University of Arizona's degree if the credits meet their graduation requirements. Students interested in credit recognition program should consult with an advisor.)

Computer Science / Informatics

Computer Science spans the range of topics from theory to programming. The SU Computer Science program offers a comprehensive foundation that permits its graduates to adapt to new technologies and new ideas in computing. Computer Science covers theoretical and algorithmic foundations to developments in new areas such as Internet of Things (IoT), robotics, computer vision, intelligent systems, bio-informatics, and others.

Computer Science graduates (i.e. Computer Scientists) design, develop, and analyze various types of computer systems from systems of infrastructure (computer hardware, operating systems, communications networks, etc.) to application technologies (mobile and web applications, databases, etc.).

Computer Science Degree Plan

Curriculum Structure

YEAR 1	YEAR 2	YEAR 3	YEAR 4
General Education Courses		CS Core Courses	
		Electives	
CS Foundation Courses		Internship	
		Final Project / Capstone	

Laboratories

NO.	NAME	UNIT
1	Computer Lab	4
2	Physics Lab	1
3	Wet (Biology & Chemistry) Lab	1
4	Internet of Things (IoT) Lab	1
5	Computer Network and Administration Lab	1

Graduate Profile:

1. Graduates will be able to analyze and design computer systems with logical, computational, and critical thinking, to contribute in solving computational problems.
2. Graduates will be able to act and behave in an ethical and professional manners, and to recognize the value of diversity and sustainability in the society.
3. Graduates will be able to demonstrate the capacity for lifelong learning.

Program Learning Outcomes

By graduation, students in the Computer Science/Informatics program are expected to attain the following Program Learning Outcomes:

1. Intellectual understanding and ability to apply basic mathematics and computer science theory.
2. Ability to have a critical and creative perspective in identifying and solving problems using computational thinking.
3. Use relevant skills in learning areas of computer science to increase productivity.
4. Demonstrate a commitment to ethical and professional behavior in the workplace and daily life.
5. Able to communicate effectively with stakeholders from diverse backgrounds.
6. Learn new models, techniques, technologies, and tools to apply effective self-improvement for life (lifelong learning).

7. Demonstrate interpersonal skills as part of a team, including leadership skill, in delivering quality results/solutions.
8. Apply entrepreneurial skills in the field of information technology.

Degrees offered:

Sarjana Komputer

Equivalent to a BS in Computer Science

(Note: Students' credits at SU may be recognized by University of Arizona to earn a University of Arizona's degree if the credits meet their graduation requirements. Students interested in credit recognition program should consult with an advisor.)

Information Systems

The Information Systems program prepares graduates to work in several sectors to integrate information technology solutions and business processes for the purpose of meeting the information needs of businesses and organizations. Our graduates will understand both technical and organizational factors, and help organizations determine how information and technology-enabled business processes can provide a competitive advantage. They are expected to contribute to the nation's development in the Information Systems sector, particularly in the e-Commerce, Big Data, Data Science, and Information Security sectors. Graduates of the Information Systems study program are being prepared to become information systems graduates able to contribute to building Indonesia in information systems related areas, especially in the field of e-commerce and Information Systems security.

Information Systems Degree Plan Curriculum Structure

YEAR 1	YEAR 2	YEAR 3	YEAR 4
General Education Courses		IS Core Courses	Electives
			Internship
IS Foundation Courses			Seminar
			Senior Capstone

Laboratories

NO.	NAME	UNIT
1	Computer Lab	4
2	Physics Lab	1
3	Wet (Biology & Chemistry) Lab	1
4	Internet of Things (IoT) Lab	1
5	Computer Network and Administration Lab	1

Program Educational Objectives:

1. To produce Information Systems graduates able to use innovative approaches to solving complex technical problems through the application of sound Information Systems' principles.
2. To provide students with a solid foundation in information systems mathematics, basic sciences, and other related fields to empower them to successfully pursue graduate studies or a career.
3. To equip students with life-long learning skills so that they can successfully adapt to the evolving technological landscape throughout their professional careers.
4. To equip students with strong communication skills and the ability to collaborate in teams.

Student Learning Outcomes

By graduation, students in the Information Systems program are expected to attain the following Program Learning Outcomes:

1. To identify, formulate, and solve problems related to information needs in an organization.
2. To integrate IT based solutions effectively in an organization.
3. To apply basic concepts in planning, designing, building, operating, and evaluating Information Systems.
4. To work with professional ethics in the IT area.
5. To communicate effectively across various groups and levels.
6. To engage in a life-long continuous learning process.
7. To collaborate effectively as both a member and a leader in a teamwork
8. To Identify the need to become entrepreneur in the field of IS/IT

Degrees offered:

Sarjana Komputer

Equivalent to a BS in Information Systems

(Note: Students' credits at SU may be recognized by University of Arizona to earn a University of Arizona's degree if the credits meet their graduation requirements. Students interested in credit recognition program should consult with an advisor.)

Visual Communication Design (New Media)

The Visual Communication Design (New Media) program is a multidisciplinary program within the Faculty of Science and Technology that utilizes a core of design pedagogy coupled with technology-enhanced teaching and learning to produce graduates capable of creating interactive, digital, visual interfaces, audio-video, animation for a variety of applications and new media industries. The multidisciplinary nature of the program means that students will gain core knowledge in design, interactive creative programming, 2D/3D animation, motion graphics, audio/video production, Augmented and Virtual Reality authoring and Transmedia storytelling, with introductions to business and entrepreneurship.

This program's emphasis on project-based technologically driven learning incorporates collaborations between its students with students from other programs such as engineering and computer science.

Information Systems Degree Plan

Curriculum Structure

YEAR 1	YEAR 2	YEAR 3	YEAR 4
General Education Courses		VCD Core Courses	Portfolio Preparation
			Internship
VCD Foundation Courses			Exhibitor
			Senior Capstone

Laboratories

NO.	NAME	UNIT
1	Creative Center Lab	2
2	Audio/Video Greenscreen Lab	1
3	Motion Capture Lab	1

Program Educational Objectives:

1. To produce VCD graduates able to solve problems and create new things through a scientific approach to visual communication design.
2. To produce VCD students solid foundation of design methods and new media so that they can produce innovative, creative, aesthetic visual communication design works.
3. To equip students with life-long learning skill so they able to apply professional ethics in the field of visual communication.
4. To equip students with strong communication skills who can facilitate design practices and work in collaborative situations.

Student Learning Outcomes

By graduation, students in the Visual Communication Design program are expected to attain the following Student Learning Outcomes:

1. Able to apply general design theory, principles, and theoretical concept of visual communication design perception in depth.
2. Understand and able to apply concepts, principles, methods and techniques for colour application, composition, design process, photography, computer graphics, animation, interactive game design, user interface, user experience, recording and editing of video and audio media for design practises.
3. Ability to use drawing, graphics, and three-dimensional design techniques to meet desired needs.
4. Ability to process and produce Virtual Reality (VR) and Augmented Reality (AR) as a new media format of visual communication.
5. Understanding and applying general concepts of history and culture in art and design.
6. Understanding and applying concepts related to the Indonesian social, cultural, ecological environment
7. Ability to communicate and collaborate effectively on teams to accomplish goal.
8. Understanding of professional, ethical, social and media issues and responsibilities

Degrees offered:

Sarjana Desain

Equivalent to a BS in Visual Communications and Design

Business

Business academic programs are aligned with the nation's demand for highly trained individuals to fill high-demand jobs in the business management, banking, and financial services sectors. Programs are designed to meet the nation's talent shortages and insure that all students are well-positioned to compete for jobs in Indonesia and abroad.

Students have unique study-abroad opportunities through partnerships with overseas universities. They have the ability to study abroad and earn credits that directly apply to their degree at SU. All students complete internships during their studies with one of the many corporate partners of SU. The Management degree offers the following concentrations:

Entrepreneurship

The degree in Management with a concentration in Entrepreneurship combines coursework and real-world application of entrepreneurial principals through our business incubator, business case competitions and partnerships with venture capital companies. Successful CEOs and company founders from across the nation are regularly invited to share their entrepreneurship insight with the university community.

The Management degree with a concentration in Entrepreneurship will provide the latest ideas in new venture creation, financing, growth and innovation.

Management Degree with Entrepreneurship Concentration Degree Plan

Curriculum Structure

YEAR 1	YEAR 2	YEAR 3	YEAR 4
General Education Courses	Management and Entrepreneurship Core Courses		Internship
			Project-Based Collaboration
Management Foundation Final Project Courses			Final Project
			Electives

Program Educational Objectives:

1. To produce internationally competitive Business Management graduates who can become ethical business people or entrepreneurs and can lead with integrity.
2. To produce Business Management graduates with strong communication and collaboration skills who can act and think globally
3. To produce applied scientific and research works that can contribute to the field of business at the regional, national and international level.
4. To produce Management graduates who have a sense of responsibility for national social and economic development to improve the quality of life through their work and service
5. To develop a strong alumni network of talented graduates who can share their experience and expertise for the betterment of others

Student Learning Outcomes

By graduation, students in the Management program are expected to attain the following Student Learning Outcomes:

1. Apply essential content knowledge regarding the management of self, others and organizations
2. Analyze and improve knowledge and skills with a self-development profile.

3. Conduct an analysis of stakeholders and formulate ethical business decisions
4. Assess teams to facilitate and improve teamwork and team performance
5. Execute a project to achieve task and person-focused objectives
6. Perform a strategic analysis appropriate to a variety of organizational environments
7. Conduct analysis of organizational environments to introduce elements of innovation and best practices

Degrees offered:

Sarjana Manajemen

Equivalent to a BS in Management

(Note: Students' credits at SU may be recognized by University of Arizona to earn a University of Arizona's degree if the credits meet their graduation requirements. Students interested in credit recognition program should consult with an advisor.)

Banking and Finance

Students learn to manage money in banks and investment houses, circulate money and grant credit, acquire various types of financing, and assess the financial needs of companies and individuals. Our partnership with HSBC also means that students have opportunities for scholarships and internships as part of the program.

Management with Banking and Finance Concentration

Degree Plan

Curriculum Structure

YEAR 1	YEAR 2	YEAR 3		YEAR 4

5. Execute a project to achieve task and person-focused objectives
6. Perform a strategic analysis appropriate to a variety of organizational environments
7. Conduct analysis of organizational environments to introduce elements of innovation and best practices

Degrees offered:

Sarjana Manajemen

Equivalent to a BS in Management

(Note: Students' credits at SU may be recognized by University of Arizona to earn a University of Arizona's degree if the credits meet their graduation requirements. Students interested in credit recognition program should consult with an advisor.)

Accounting

The international curriculum and faculty provide technical expertise in the Accounting field and develops necessary critical thinking, team-building, communication, and information technology skills. The program will prepare students for professional careers in public, corporate and governmental accounting, personal financial planning, portfolio analysis and consulting.

Accounting Degree Plan

Curriculum Structure

YEAR 1	YEAR 2	YEAR 3	YEAR 4
General Education Courses		Accounting Core Courses	Internship
			Project-Based Collaboration
Accounting Foundation Courses			Final Project
			Electives

Program Educational Objectives:

1. Accounting graduates demonstrate good accounting knowledge and skills
2. Accounting graduates hold integrity and stewardship values, able to communicate complex ideas in writing and through oral presentations and work effectively in diverse team settings
3. Accounting graduates exhibit proficient skills in information systems and digital technologies to analyze business problems and provide comprehensive solutions
4. Collaboration with professional accounting bodies and corporations to improve the accounting students' competencies continuously
5. Develop community service programs that contribute to accounting students' social awareness
6. Perform researches in Accounting that address the needs of government, business, and organizations at national and international levels
7. Build a strong accounting alumni network to provide the long-term value to accounting study program and students by giving alumni the chance to stay in contact and continue to learn from each other after they graduated from the university.

Student Learning Outcomes

By graduation, students in the Accounting program are expected to attain the following Student Learning Outcomes:

1. The ability to integrate theoretical and technical accounting knowledge in business context
2. The awareness and application of existing and emerging digital technologies and information systems
3. Exercise judgment to provide potential solutions to accounting and other business problems by considering social, ethical, economic, regulatory, sustainability, governance, and/or global perspectives
4. The ability to anticipate future trends by extrapolating existing trends and facts and filling the gaps by thinking innovatively
5. The ability to evaluate and manage risks that might prevent organizations from successfully implementing strategy

Degrees offered:

Sarjana Akuntansi

Equivalent to a BS in Accounting

Faculty of Education

The Faculty of Education at Sampoerna University provides the academic and professional development for undergraduate students to become high-quality Mathematics and English as a Second Language and Foreign Language teacher candidates in all primary and secondary education systems. Students will complete a comprehensive program of General Education courses, study program foundation and core courses, School Experience Program (four-year developmental internship program), and Capstone Project. The program considers contemporary global research and best practices to prepare our graduates to meet the demands of the teaching profession and to be ready to address challenges in teaching and learning in schools in Indonesia. The faculty of Education also aims to create visionary teacher leaders with the capacity and critical awareness to contribute to improving Indonesian Education and society. Such attainment is made possible by the learning experiences in an environment that promotes integrity, creativity, reflective thinking skills, and collaborative and entrepreneurship skills necessary for participating in a global community.

English Language Education

This program offers students opportunities to explore contemporary theories and practices underpinning English Language curricula and instruction and

to develop 21st Century skills in teaching English for different grade levels of primary and secondary schools. Prospective teachers will have the capacity to utilize technology as a platform in English Language Teaching to engage learners and to accommodate students' various learning styles and needs.

English Language Teaching Degree Plan

Curriculum Structure

YEAR 1	YEAR 2	YEAR 3		YEAR 4
General Education Courses		English Language Education Core Courses		Social Internship Program/Kuliah Kerja Nyata (KKN)
English Language Education Foundation Courses				Final Project
				Electives

Program Educational Objectives:

1. Produce graduates who are equipped with the knowledge and skills of TESOL best practices in the United States
2. Produce graduates who possess creativity, communication skills, integrity, and a high degree of social responsibility
3. Produce prospective English Language teachers who are competent in teaching English and consistent with contemporary educational values
4. Produce graduates who are able to integrate ICT, science, engineering concepts and art (STEAM) literacy in the learning process and have a lifelong and reflective learning paradigm
5. Produce graduates who are capable in designing and implementing programs of English for specific purposes by using appropriate digital technologies
6. Produce academic research in the fields of education, language and culture, and English teaching to solve language problems in national scope and to contribute to the broader field of knowledge
7. Cooperate with other institutions in the fields of teaching, research, community service and other academic activities to further develop the quality of English Language Teaching programs

8. Organize community service programs that make a meaningful contribution to society and advance Indonesia's educational and social progress

Graduate Profile

Graduates of English Language Education at Sampoerna University are beginning teachers who acquire the knowledge, skills, and dispositions of 21st Century educators as presented in the following figure.

Degrees offered:

Sarjana Pendidikan

Equivalent to a BA in English Language Education

Psychology

The Psychology major at Sampoerna University gives students the opportunity to explore the complex world of the mind and brain—how the mind and brain evolve from infancy to old age, the environmental influences that shape our behavior, and the impact of brain disorders such as autism and Alzheimer’s disease. You will gain new insights in areas of cognitive science and cognitive neuroscience, including performance, sensation, perception, language, thinking, decision making, and judgment.

Psychology Degree Plan Curriculum Structure

YEAR 1	YEAR 2	YEAR 3	YEAR 4
School Experience Program / Internship			
General Education Courses		PSY Core Courses	Electives
PSY Foundation Courses			Internship
			Seminar
			Senior Capstone

Program Educational Objectives:

1. To organize a psychology study program which is oriented towards national and international education standards and which produces competent graduates in the field of health psychology who can help individuals, communities, and societies be physically and mentally healthy. You will gain new insights in areas of cognitive science and cognitive neuroscience, including performance, sensation, perception, language, thinking, decision making, and judgment.
2. To conduct research in psychology based on national and international standards of research.
3. To implement community services as an application of the science of health psychology.

Student Learning Outcomes

1. Able to solve problems based on the development of science, information, and communication technology related to the field of psychology.
2. Able to carry out psychological assessments by the principles of assessment and psycho-diagnostics as well as the Psychological Code of Ethics.
3. Able to design, implement, and evaluate a program for problem-solving based on the principles of non-clinical psychology interventions.
4. Able to conduct research, with quantitative and qualitative methodology, and utilizes research result for the wellbeing of individuals, community, organizations, and society
5. Able to work in a team and cooperate constructively in achieving organizational goals.
6. Able to give recommendations for motivating mental health for individuals, community, organizations, and society, as part of strategies for recovery from physiological illness and a healthy lifestyle.
7. Able to run an independent business in any field, with the help from psychological framework of thinking for managing business operations.

UNIVERSITY PARTNERS

UNIVERSITY PARTNERS

In May, 2016, Sampoerna University formed a partnership with

In Fall of 2024, Sampoerna University formed a partnership with Keiser University of Florida to collaboratively offer General Education courses consistent with the core curriculum of many American universities. This collaboration provides an optional pathway for our students to earn a two-year Associate degree from Keiser University for those students who meet KU's graduation requirements. In addition, our agreement with Keiser University provides our lower-division students with access to KU's extensive digital resources, libraries and support services.

Keiser University is the largest, private university in Florida and is recognized for providing social and economic mobility for its graduates.

More information about Keiser University is available at www.keiseruniversity.edu

The University of Arizona has partnered with Sampoerna University to co-develop credit recognition programs that may lead to a degree completion in Engineering and Business on the SU campus. These programs allow students who meet program level objectives and graduation requirements to obtain transcripts and diplomas from the University of Arizona. Students in these programs also may choose to complete part of their program at the UA main campus in Tucson, Arizona, and graduate at the campus commencement.

Students interested in these degree pathways should consult an SU transfer advisor early in their academic career, as there are specific pre-requisites that must be fulfilled prior to transfer application.

More information about the University of Arizona can be found at
www.arizona.edu

ACADEMIC POLICIES AND PROCEDURES

Financial Information

Undergraduate Consolidated Tuition and Fees

Consolidated tuition and fees vary by study program and level (lower-division and upper-division). Consolidated tuition and fees are based on semester credit hours or SCH of 18 SCH or more per term. Students taking fewer than 18 SCH will be charged on a per credit hour basis. Consolidated tuition and fees may be locked upon admission and enrollment for up to four years so long as a student maintains full-time enrollment for the duration of his/her study program.

The estimated total cost for each degree program is based on making satisfactory academic progress and completing all graduation requirements within 4 years. All prices are in Indonesian Rupiah (million).

Financial Obligations

Students will not be permitted to attend classes, laboratories or other instructional activities until all tuition and fees (if applicable) are paid or they have made satisfactory arrangements with the Bursar's Office for the payment of tuition and fees. Students whose accounts are not current with the Bursar's Office may be denied any or all University services. Grades, transcripts and diplomas may be withheld for students owing balances to the University.

Billing and Refund Policy

Sampoerna University provides documentation of all fees and tuition charges required of students from the time of their application for admission through their enrollment. Tuition and fee rates are set annually by the University Council, although most enrolled students take advantage of a fixed rate tuition program after matriculating to SU. Any scholarships, awards or waivers offered at the time of admission are acknowledged in writing by the Bursar's Office and appear on the student's invoice each semester.

Tuition and fees are determined by enrollment status (active, inactive, on leave, etc.) and are adjusted appropriately if the University Registrar is notified of a change of status by the appropriate deadline. Any refund request must be substantiated by evidence:

- Demonstrating that a charge was incorrectly posted;
- Establishing that a student notified the University in writing in a timely manner regarding a change in status; or
- Indicating that extenuating circumstances prevented the student from enrolling after a registration deadline or the start of classes.

It is each student and family's responsibility to check the billing documents for accuracy at the time they are issued. If just cause for a refund exists, the student may submit a written request to the Bursar's Office. Should the appeal warrant further adjudication, the matter will follow the procedure for Student Grievances for review by the appropriate University officers.

Enrollment and Registration

All admitted students should respond to the Admissions decision by confirming their intent to enroll. Prior to starting classes, they must complete the following steps:

- All entering students will take the official College Readiness Test for English and Math to determine course placement (students with TOEFL or IELTS scores, IB credits and other recognized skills assessments may be granted waivers from some or all of the Accuplacer tests.)
- All newly enrolled students must attend New Student Orientation (NSO) where students will join the College, meet with their academic advisors, and register for classes; (Subject-specific placement tests may be administered, as required.)
- Pay tuition and fees before starting classes.
- Obtain student identification (ID) card. A paid schedule of classes is required to obtain a student ID.
- Purchase books or determine if texts are available online. Some books are available in the College library in limited quantities.

Class Attendance

Class attendance has a major role in the teaching/learning process and, therefore, students are expected to attend classes regularly and on time. Lecturers may set class policies regarding grade reductions for absences: these guidelines are stated in the course syllabi. Students who are absent without permission more than 25% of the classes are subject to penalties, as per Sampoerna University policy.

Exceptions to this policy are set forth below:

Non-Class Days. When this occurs, each faculty member shall determine how best to make-up the lost class time.

Non-Penalized Absences. There shall be no academic penalty for a student who is absent from academic activities because of observances of major religious holidays in his/her own faith, the student's serious illness, death in the immediate family, or attendance to statutory governmental responsibilities. A student will be held accountable if these absences result in the student exceeding the limit established for 'excessive absences' as defined in the instructor's syllabus.

The student shall be responsible for the material covered in his/her absence and shall be granted a reasonable amount of time to make up any coursework, performance assessment, labs or clinicals missed for non-penalized absences. The student shall notify instructors in advance of absence(s) to observe a religious holy day(s) in his/her own faith and shall likewise notify instructors in advance of other absences or by the next class meeting.

If a non-penalized absence occurs on the first day of class, the student shall notify the instructor of the reason for his/her absence before the next class meeting. Documentation for these absences shall be presented by the student by the next class meeting.

Extenuating Circumstances. Should a student see a difficulty in observing the attendance policy in his/her class, contact shall be made with the faculty member involved within the first week of class to work out an alternate arrangement. Alternatively, the student may seek an alternate class, where applicable, that accommodates his/her requirements.

Excessive Absences. Excessive absences from any course, regardless of the reason, may result in withdrawal of the student from the course and/or necessitate that the student repeat the course. Based upon the instructor's attendance records, the student's academic advisor will determine the penalty and options in consultation with the Registrar.

Student Status

Active Student

An active student is student who has fulfilled all entry requirements and has the right to participate in all academic activities. Requirements to become an active student are as follows:

- Apply to SU and accept an offer of admission or conditional admission
- Complete the registration process
- Pay the tuition and fee(s) due
- Complete a study plan in consultation with an advisor

Auditor

An auditor is:

- a student who is authorized to follow academic activities to enhance knowledge of some specific area without academic credit, or
- a transfer student candidate who is still in the process of diploma equivalency

An auditor may come internally from SU (those who have been enrolled as SU students) or may be a student from outside SU. Requirements for internal auditors are as follows:

- registered as an active student;
- have a minimum GPA of 3.00;
- take a maximum study load of four audited credits; and
- the total study load (regular courses + audited course) may not exceed 24 credits.

An external auditor must have advance approval from the SU administration as well as the lecturer and must meet minimum qualifications of the course. S/he will not be expected to take examinations and will not receive grades or academic credit for the course, nor will s/he be billed regular tuition.

On Academic Leave

A student on academic leave is a student who officially requests an academic leave at his or her own initiative and is exempted from the obligation to follow academic activities during certain semester(s). An academic leave can only be taken by a student for two (2) consecutive semesters, and maximum four (4) semesters during study period. Academic leaves are requested in writing to the student's Head of Program and approved by the Vice President for Academic and Student Success.

Continuing Student

Prior to the commencement of the semester, every student must register for the following semester by submitting a Study Plan (KRS) and paying any tuition and fees due.

Inactive Student

An inactive student is:

- a student who has finished an academic leave but has not registered for the following semester; or
- a student who does not register for the following semester.

Any inactive semester(s) will be counted in the total length of study.

Under Academic Sanction

A student who is found to have violated academic rules is categorized as being 'on academic sanction' and is not allowed to participate in academic activities during a period specified by the SU administration. The types of Academic Sanctions can be found below under "Student Academic Sanctions" as well as in the Student Handbook.

Reactivated Status

A student who wants to re-activate their status should:

- Submit a request letter to be an active student to the Head of their Study
- Program and copy (cc) the Academic Registry. This request letter must be submitted no later than one week prior to the add/drop period.
- Undergo the re-registration processes.
- Pay the required tuition and fees.

Withdrawn

A student might be considered academically withdrawn if he/she meets one or more of the following criteria:

- Exceeds the maximum limit of study period (more than 14 semesters);
- Has not obtained a minimum of 40 credits after 14 semesters, and/or has a cumulative GPA of less than 2.00;
- Has been studying for 14 semesters and fails to pass the final project examination;
- The student is under academic sanction
- The student has been inactive for two consecutive semesters without any written information from the student and his/her advisor(s).

Internal Transfer

Internal transfers can occur between study programs at the same level and between majors/concentrations within a study program and faculty. Requirements for executing the transfer process are as follows:

- There is an available slot in the intended class
- The student has "Active" status
- The student has obtained the permission/recommendation of the Head of the previous study program and the Head of the intended study program, acknowledged by the relevant Dean(s)

- The student has studied for at least two semesters
- The student is not in the process of withdrawal or under academic sanctions

External Transfer

External transfer process may involve students transferring out from SU to other higher education institution or students transferring into SU from other higher education institution.

• Transfer-out

- Advising activities for students intending to transfer out will be under SPAC
- SU students may start their transfer process after completing at least one full semester at SU
- SU cannot determine and/or guarantee transfer admission or total number of credits transferrable at another higher education institution, unless a previous articulation agreement has been established between SU and the other higher education institution(s)

• Transfer-in

- In a transfer-in process, SU may recognize external credits earned by proficiency examinations, coursework completed in other higher education institutions from the US, Indonesian or other foreign higher education institutions
- A qualified student with 18 transferrable credits or more shall be admitted and registered as a transfer student. If a student has less than 18 transferrable credits, the student shall be registered as a new student
- A maximum number of transferrable credits that can be used toward a student's bachelor's degree completion should be no more than 60 semester credits
- Acceptance of external credits is described separately under Evaluation of Academic Credit Earned Outside SU

Academic Course load

SU adheres to its educational goals and objectives by providing guidance for enrollment in the general education core and degree programs. Students are expected to enroll in a minimum of twelve (12) credit hours per academic term.

The University administration and faculty assist students with advising and enrollment into a maximum number of courses to promote a higher academic success rate and to not overwhelm the student. Faculty may assist students by advising them of courses in designated programs of study. Students are encouraged to seek the University’s advice in enrollment into courses each semester.

The maximum load in which a student may enroll is eighteen (18) credit hours per term. However, students with a cumulative grade point average (GPA) of at least 3.0 may be allowed to take additional credits. In no event shall the maximum course load exceed twenty-one (21) credit hours per academic term.

During the last term of enrollment prior to graduation, if a student needs more than 18 credit hours to graduate, approval may be sought from the appropriate dean to exceed the maximum credit hours even if the cumulative grade point (GPA) is below 3.0. Such a student shall not be permitted to enroll for more than 21 credit hours, except with the written approval of the Vice President for Academic and Student Affairs.

Students wishing to pursue more than 18 credits must meet the Grade Point Average (GPA)¹ requirements described within these policies and must receive formal permission from their academic advisor.

The maximum number of credits that can be taken is based on the GPA of the previous semester:

GPA of Previous Semester	Maximum Number of Credit
≥ 3.00	21 - 24 credits
2.50–2.99	18 credits
2.00–2.49	15 credits
≤ 1.9	9 credits

Note: Students wishing to pursue max credit load must receive formal permission from their advisors

¹ ‘Grade Point Average (GPA)’ refers to the metric that is derived from assigning letter grades numbered values (from 0-4), and then averaging a series of grades that a student achieves in a given semester (Semester GPA) or in the entirety of their degree studies (Cumulative GPA)

Definition of a Credit Hour

Sampoerna University (SU) adheres to the accepted U.S. federal and accreditation bodies’ definition of a credit hour. “Academic credit” refers to the basis for measuring the amount of engaged learning time expected of a typical student enrolled in a traditional classroom, laboratory, studio, internship, experiential learning, or distance education. “Credit hour” refers to the amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutional established equivalency that reasonably approximates not less than one hour of classroom or direct faculty instruction, and a minimum of two (2) hours out of class student work each week for approximately fifteen (15) weeks for one (1) semester or other recognized term, or the equivalent amount of work over a different amount of time.

The contact hour formula is as follows:

Minutes/Week	Weeks/Semester	Total Hours
50 – Facilitated Learning	X 16	= 45
60 – Self-Managed Learning		
60 – Application & Practice		

For courses delivered during the short summer semester, courses are expected to have the same number of contact hours and the same requirement for out-of-class learning as courses taught in a fall or spring semester.

Evaluation of Academic Credit Earned Outside SU

Students who are seeking academic credit for courses completed at other institutions or through prior learning assessment must be currently enrolled in a degree or certificate program at SU. Transfer credit evaluation will be coordinated under SPAC office. Any transfer credits must earn at least C grade or its equivalent to be accepted as SU credits.

Transfer Credit

Academic credit is generally accepted only from institutions that are accredited by one of the regional accrediting associations approved by the Council on Higher Education Accreditation. All non-English transcripts must be evaluated on a course by course basis by a NACES-recognized transcript evaluation service.

Proficiency Examinations

Academic credit or advanced placement may be granted following either a review of the content of specific courses or by passing a proficiency examination in compliance with individual department policies and subject to approval by the department chairperson and the appropriate dean.

Students are responsible for submitting all required documentation to the Records Office and petitions requesting the granting of such credit. Credit awarded in this manner will be added to the semester hours earned but not the semester hours attempted or the grade points.

Articulation Agreements

SU has formal and informal relationships with institutions in the United States and abroad that have agreed to accept credit for courses completed at SU according to their respective curricular requirements. Students may transfer from SU to a partner institution after one or two years of study.

Students who fulfill degree requirements at an overseas institution that is working in partnership with SU and continue to be enrolled at SU will be required to submit academic reports each semester to their academic advisor. If program learning objectives are comparable, SU may reverse transfer the credits for the purpose of awarding a degree.

SUBSTITUTION OR WAIVER OF SPECIFIC COURSES

In certain cases, a student may petition to substitute or waive a specific course or courses. The University may grant or deny such a petition on a case-by-case basis and the decision of the University is final. A course substitution is a course that is approved to replace another course requirement in fulfilling a program of study.

A request for course substitution may be considered for the following reasons:

- Upon determination of equivalency between a course (or courses) taken at another accredited institution and a course (or courses) required at SU;
- Upon determination that the substitution of a course (or courses) normally required may benefit the student given his/her academic or career goals, and would not alter the fundamental nature of their program of study;

- To enable a student to repeat a course to improve a grade for which no identical course number or title exists among the University offerings.
- A petition for a course waiver in any area of general education must be recommended by the appropriate Dean and approved by the Vice President for Academics and Student Affairs.

CONVERSION OF NON-CREDIT TO CREDIT

Recognition of Prior Learning or Rekognisi Pembelajaran Lampau (RPL) is the process of recognition of learning achievements obtained previously through formal, non-formal, and informal education as well as from trainings related to work or self-taught through life experience. Recognition of learning outcomes is intended to place someone at the appropriate qualification level according to competency standards (KKNI levels).

Participants/students who seek to enter the University with non-credit conversion through RPL program must submit a written request equipped with a set of portfolio that arranged according to his/her life experience or equipped with his/ her past learning results along with relevant and valid evidences acknowledged by an educational institution that is authorized to conduct RPL assessment.

The University may award academic credit for coursework taken on a non-credit basis only when there is verifiable documentation that the non-credit coursework is equivalent to a designated credit experience which is validated by authorized education institution approved by DIKTI. Validation should be based upon thorough evaluation and approval process that follows standards of good practice when awarding academic credit for course work taken on a non-credit basis.

ACADEMIC STANDARDS OF PROGRESS

The intent of the University is to ensure students achieve measurable qualitative and quantitative progress toward their educational goals. The University regulations regarding academic standards of progress apply to all college credit courses in determining academic progress and cumulative grade point averages.

To maintain satisfactory academic progress, a student must achieve a minimum grade point average (GPA) of 2.0 or higher each term².

A student who fails to maintain satisfactory academic progress will be placed on one of the following levels of academic intervention based on the student's term, degree, and cumulative grade point averages:

- Academic Warning
- Academic Probation
- Academic Suspension

² Students who are recipients of financial aid and/or sponsorship may be required to achieve a higher GPA to qualify for financial support. Student pursuing degrees with our University Partners may be required to achieve higher GPA's and should consult with the Catalogs at their respective institutions.

Academic Warning: Any student who does not achieve a cumulative GPA of 2.0 or higher in a term will be placed on academic warning. Students on academic warning will be notified and should see an academic advisor or counselor prior to registering for the next term. A student will be removed from academic warning when he/she earns a cumulative GPA of at least a 2.0. A student on academic warning who fails to achieve a term GPA of 2.0 or higher for two successive terms of enrollment will be placed on the next level of academic intervention – academic probation.

Academic Probation: A student on academic warning who fails to achieve a term GPA of 2.0 or higher for two successive terms will be placed on academic probation. Students on academic probation will be required to see an academic advisor or counselor prior to registering for the next term. The status of students who demonstrate forward progress by earning two successive term GPAs of at least a 2.0 will be changed from probation status to warning status. A student on academic probation who fails to achieve a term GPA of 2.0 or higher for two successive terms will be placed on the next level of academic intervention – academic suspension.

Academic Suspension: A student on academic probation who fails to achieve a term GPA of 2.0 or higher for two successive terms of enrollment will be placed on academic suspension. Any student on academic warning and who earns less than a 2.0 term GPA and/or cumulative GPA for two successive terms will be placed on academic suspension for a minimum of one year. During the suspension period, the student may register for college preparatory courses only. After the first academic suspension and after the student has satisfied the suspension requirements, the student must see the Dean or designee. The student must follow the instructions pertaining to course selection.

Any subsequent suspensions will require the student to petition and appear before the Academic Standards Committee before continued enrollment at the University. University advisors, including faculty counselors, program managers, associate deans, academic and student deans, will assist students with

advising and enrollment into courses at the University. Faculty may assist students by advising them of courses in designated programs. Students are advised to consult their academic advisors for recommendations on their enrollment into courses each semester.

To assist all students in reaching their full potential, SU commits to develop a comprehensive strategy for supporting students who fall into academic sanctions. The Enrollment Services and Student Success unit will work with students needing assistance to regain their good academic standing, utilizing resources such as the Tutoring Center, the Counseling Center, Heads of Programs, and Academic Advising. The University Registry will retain records of changes in status and will notify students and advisors of any academic sanctions.

GRADES AND GRADE APPEALS

A grade must be recorded for every credit course in which a student is enrolled. The final course grade is submitted electronically to the Registrar's office and is posted online at the end of the term.

The course syllabus provides the faculty member's final course grade policy. Each student shall be provided with a course syllabus that complies with SU's mission, goals, and policies and includes the faculty member's grading rubric and academic honesty policy for the course.

A student may be able to appeal the final course grade issued by the professor. The basis for an appeal of the final course grade shall be evaluated in terms of the standard established by the faculty member as stated in the syllabus, in accordance with institutional policies. The appeal must demonstrate that the faculty member did not assign the final course grade in accordance with the grading policy outlined in the course syllabus.

Faculty Grading Policy

Each faculty member shall communicate, in writing, the grading policy in the syllabus for the course within the first week of class meetings of each course. The elements to be considered in calculating the student's final course grade shall be articulated, and all factors to be considered in arriving at the final grade shall be stated. Any grade appeal shall be considered in the context of the faculty member's stated grading policy in the syllabus. Students must be provided with any modifications to the syllabus.

GRADES			POINT AWARDED
A	Excellent	(90-100)	4.00
B	Good	(80-89)	3.00
C	Average	(70-79)	2.00
D	Below Average	(60-69)	1.00
F	Failure	(59 or below)	0

An **"I"** grade (Incomplete) may, at the discretion of the Faculty, be given in courses for a student who has a reasonable chance of successfully completing the course. The student who has not completed the required course work by the end of the term may be required to provide documentation for extenuating circumstances. The student should make arrangements to have the **"I"** changed to a final grade by the instructor (by the agreed upon date) during the next full term (summer terms are not considered in this time limit). If no change is initiated during the next full term, the **"I"** will automatically become an **"F"** on the student's permanent record. If the course work is completed, resulting in a passing grade, the student's transcript will be amended and his/her final GPA recalculated.

RETAKE POLICY

A student who earns a grade of 'F' grade is obliged to retake the course by re-enrolling in that course in a new semester through the Study Plan (KRS) submission process. The grade shown on the transcript will be the best grade obtained. Tuition fees may be charged if the course is retaken more than once.

Students admitted to SU in Fall 2022 and after are subjected to a revised policy approved on xx. In the new policy:

- Students may attempt the same course no more than three attempts
- Completing a course that earned any letter grade, registered to a course but withdrawn at any time after add/drop period, or auditing a course will be considered as one attempt
- A student who retakes a course to reach minimum academic standard is highly encouraged to seek support from his/her advisor and/or other supporting units and resources
- A student may retake a course after earning a passing grade to improve his/her cumulative GPA only with approval from his/her faculty advisor
- Only one course with the highest grade of any attempts will be recorded on SU's official transcript and is calculated toward student's cumulative GPA and total credit earned
- Second and third attempts of the same course shall be charged by the total credit hours of the course. Details of the charges should be discussed with SU's Bursary

AWARDS AND GRADUATION

The purpose of this policy is to establish student performance standards for graduation and the awarding of degrees. The University offers the bachelor's degree along with a full complement of general education courses that may be applied to other degrees at other institutions.

- Complete at least 144 SKS (equivalent to 120 credit hours) of college credit;
- Complete the program of study as set forth in the University Catalog;

- Complete a minimum of 36 credit hours of the program's general education courses that include the following: six (6) credits in Behavioral/Social Sciences, six (6) credits in Humanities, six (6) credits in Mathematics, nine (9) credits in Communications, and nine (9) credits in Science, Lab, and Wellness;
- Complete any prescribed college preparatory and English for Academic Purposes courses, if required, with a grade of "C" or higher;
- Earn a cumulative grade point average (GPA) of at least 2.0, including any transfer credits which comprise the Degree;
- Fulfill all financial and other obligations to the University

Graduation will be held at least once in an academic year as set in the academic calendar. Designations of academic achievement at graduation are determined based on the following GPA ranges, and are noted on the transcript:

GPA Categories for Graduates

Cumulative GPA	Categories
3.90–4.00	Summa Cum Laude
3.75–3.89	Magna Cum Laude
3.50–3.74	Cum Laude
3.00–3.49	Very good
2.50–2.99	Satisfactory
2.00–2.49	Fair

ACADEMIC SUPPORT UNITS

ACADEMIC SUPPORT UNITS

Student Parent Advisory Center (SPAC):

The Student Parent Advisory Center is a special resource only offered at Sampoerna University, where interested students and parents can obtain objective and comprehensive information about education pathways and explore the programs best suited for them. Members of the SPAC team are qualified academic advisors who help students explore their education options in Indonesia and abroad. Interested parents and students can have an in-depth discussion about their education goals and receive focused and individualized support.

Tutoring Center

The Tutoring Center provides free tutoring and computer-use services to all SU students. Faculty and peer tutors from Sampoerna University are available for Math and English support. Tutoring may also be scheduled for subjects covered in the Core Curriculum and Programs of Study. Students may request support through group or individual sessions, or may be referred for tutoring by their instructors.

Counseling Center

The Counseling Center's services are available for all students who are experiencing difficulties in their academic work or personal lives. Trained staff meet individually with students to help them gain insight into their issues and develop coping strategies. All counseling appointments are strictly confidential and are not reflected on a student's academic records or reported to ACADEMIC SUPPORT UNITS 52 Sampoerna University.

Academic Writing Workshops

Offered by instructors from the Tutoring Center and English Language Education, these workshops focus on helping students develop their ability to write effectively in an academic setting. Students learn how to effectively paraphrase and cite research using international standards of writing. Most important, students gain a greater awareness on the importance of academic integrity and meeting high ethical standards.

Math Lab

The Math Lab provides a collaborative and safe environment for students to discuss mathematical topics and problems from their courses. The Math Lab employs lecturers and faculty-recommended students to help students deepen their understanding of course material, practice problems with the guidance of a peer tutor, and develop necessary study and test-taking skills.

Bridge Program

SU provides an intensive English language and Mathematics program for new students who need some support to meet the college-ready expectations required to enter SU academic programs. New students can enroll in English for Academic Purposes and/or Math Preparation during the term before beginning college credit courses. Placement is based upon test scores on the Basic and Advanced Skills Tests, administered during the admissions process.

Center for Excellence in Teaching and Learning (CETL)

The Center for Excellence in Teaching and Learning (CETL) is established to enhance the quality of teaching practices of Sampoerna University (SU) faculty members. CETL views excellence in teaching-learning as the most important aspect that promotes student success. Thus, CETL is committed to enhancing faculty members' capacity through various professional development programs on innovative pedagogical practices, cutting-edge technologies, and building students 21st-century skills. CETL values and recognizes SU faculty members' excellence in teaching-learning practices and innovation. Thus, through the SU learning festival, CETL facilitates faculty members to share ideas on best practices in utilizing Canvas and other technological tools for innovative teaching, leading to the scholarly discussion of teaching and learning. CETL programs are also designed to facilitate a teaching culture and to emphasize the importance of developing a Learning Community among the faculty members for the ongoing excellency in teaching-learning.

Contact us by email at cetl@sampoernauniversity.ac.id to inquire further about our programs.

STUDENT RIGHTS AND RESPONSIBILITIES

STUDENT RIGHTS AND RESPONSIBILITIES

Student Rights

Every student has the right to:

- Receive access and opportunities to develop and apply their knowledge through instruction, learning, research, and community service activities
- Receive guidance from lecturers and academic advisors
- Receive high quality academic support services
- Engage in co-curricular and extracurricular activities
- Express their opinions constructively in comments or complaints, in accordance with social and ethical guidelines
- Review their educational records (admission materials, transcripts and other information on individual academic progress, documentation on disciplinary action, counseling, written complaints, and the official correspondence relating to these items) by submitting a written request to the relevant department.

Student Responsibilities

Every SU student has the obligation to:

- Uphold the Indonesian law and the principles of *Pancasila*
- Demonstrate an exceptional moral code
- Practice the principles of academic integrity (not cheating in any form, deceptive fabrication, plagiarism, or violation of copyright laws)
- Show respect for differences relating to ethnic or national origins, religious affiliation, gender, sexual orientation, and disabilities
- Uphold the ethos of scientific, scholarly investigation demonstrating open, universal, objective, critical, and balanced analysis
- Observe the institutional code of ethics
- Refrain from inappropriate personal relationships with lecturers, professors, and other University officials.

Academic Integrity

Students, faculty members, researchers, and/or anybody who is engaged in academic pursuits may not claim words and ideas of another as their own. They are required to give credit and correct attribution to the original source, where it is due.

The key element of this principle of academic honesty is that authors do not present the work of another as if it were their own work. This can extend to ideas as well as written words. If authors model a study after one done by someone else, the originating author should be given credit (American Psychology Association – Publication Manual: Ethics Code, 6th Ed., Washington, D.C., 2010).

Appropriate sanctions for any academic ethical violations are determined by the adjudicating officers or committee and authorized by the University Rector and/or President. Actions may include, but are not limited to:

- Academic Warning: Formal censure with a written warning of academic probation;

- Cancellation of a test, exam, or assignment, and giving a grade of “O” or “F” for this activity within a course grade calculation;
- Withdrawal of the student from the course without any tuition refund, requiring a future repeat of the necessary credits
- Academic suspension for one or more terms;
- Expulsion from the University.

For more detailed information and procedures, please consult the current Student Handbook, available online and from the Academic Registry and the Student Affairs Office.

Student Records

Permanent records for SU students are maintained by the University at its campus in Jakarta, Indonesia. These records are accessible to eligible students. Transcripts of coursework are available upon written request by the student.

With regard to the protection of student privacy, SU policies comply with U.S. standards of best practices and federal law as per partnership agreements with U.S. institutions and their respective U.S. accrediting organizations. SU recognizes the U.S.’s [Family Educational Rights and Privacy Act](#), which requires authorization by any student aged 18 and above for the institution to release educational records to another party.

Student Academic Sanctions

In the event that the institution’s principles of academic integrity are violated, a student is subject to an investigation and hearing, conducted by an ad hoc committee usually comprising the instructor involved, the Head of the Program the relevant Dean, and the Registrar. The implementation of any academic sanctions results from the adjudication of this ad hoc committee. Disciplinary proceedings are initiated by any member of the academic staff who has direct or indirect knowledge of a violation.

Academic sanctions may be imposed if the committee conclusively determines that a student has engaged in any of the following acts:

- Falsifying a signature related to the courses, study plan, transcript, certificate or other academic document
- Cheating on any test or examination or assisting others to cheat
- Plagiarism on any graded assignment or exam; submitting another person’s work as one’s own in any form
- Falsifying data on any research project, paper, or laboratory exercise
- Attempting to influence an instructor to alter a grade or assignment through payment, gifts, or services.

Appropriate sanctions for any academic ethical violations are determined by the adjudicating committee and authorized by the University Rector. Actions may include, but are not limited to:

- Academic Warning: Formal censure with a written warning of academic probation;
- Cancellation of a test, exam, or assignment, and giving a grade of “O” or “F” for this activity within a course grade calculation;
- Withdrawal of the student from the course without any tuition refund, requiring a future repeat of the necessary credits
- Academic suspension for one or more terms;
- Expulsion from the University

Student Grievances

Sampoerna University is committed to fostering an educational environment that promotes the highest level of learning and moral character development of its students. To support this commitment, SU strives to ensure all students are treated equitably and in accordance with University policies. Should a case arise in which a student believes that SU has not acted in accordance with its policies, the student should first seek to resolve the issue informally with the respective individuals. If these informal procedures prove unsatisfactory, the student may file a formal complaint to seek resolution.

Definition

A formal student complaint at SU may be filed when a student can demonstrate that SU has not followed University policies. Some SU policies contain formal appeal and/or grievance procedures. As such, formal complaint procedures are not intended to bypass these established, official appeal processes (e.g. admission decisions, grade appeals, conduct sanctions).

Formal complaints should be used as the final option when informal resolution strategies have been unsuccessful. Formal complaints must be filed in a timely manner, submitted in writing, through designated communication channels, and in accordance with University policies and procedures.

For a student complaint, grievance, or appeal to be considered a formal student complaint, it must meet the following criteria:

- The complaint, grievance, or appeal alleges a violation of official SU policy **OR**
- The complaint, grievance, or appeal is governed by an official SU policy **AND**
- The complaint, grievance, or appeal has been unsuccessfully resolved through informal resolution strategies **AND**
- The complaint, grievance, or appeal has been communicated in writing and asserts a formal complaint is being filed (e.g., letter, memo, email).

The following outlines complaint procedures at SU.

Procedures

Most student complaints are governed by official University policies. Students filing a complaint related to an official policy, as shown below, should refer to the procedures and expectations as outlined within the relevant policy statement for appeal and/or grievance procedures.

Types of Student Appeals:

1. Admission Decisions

Any student candidate dissatisfied with an Admission decision may ask for an explanation from the Admission Office. In the case that the issue cannot be resolved, the student candidate can make an appeal for decision review by the Admission Committee which has the responsibility for reviewing applications with extenuating or special circumstances and the authority to grant admissions to applicants who have strong merit but do not meet all prescribed requirements, as stated in the Admission Policy.

2. Grade Appeals

Any student who strongly feels that he/she has been given an unfair grade(s) may request an academic appeal as regulated in the Academic Policy as follows:

- a. An academic appeal is a formal request brought by a student to change a grade, or to challenge a penalty imposed for violation of standards of academic integrity, such as plagiarism or cheating.
- b. A request to change a grade or to challenge a penalty must be made within six months of the action. A grade may only be changed by the course instructor (or by the Dean in the absence of the course instructor) or by the Academic Appeals Committee (see Academic Policy article 63).
- c. An academic appeal will be considered if there is evidence that one or more of the following conditions exists,
 - i. error in calculation of grade;
 - ii. deviation from the syllabus;
 - iii. academic disparate treatment of a student; or
 - iv. Inappropriate penalty(ies) imposed for an academic integrity violation.
- d. An appeal will not be considered because of general dissatisfaction with a grade, penalty, or outcome of a course, or because of disagreement with the instructor's professional judgment of the quality of the student's work and performance.

Conduct Sanctions

Anyone who knows that a violation of the Code of Ethics has occurred has the right to report the occurrence to the Standing Committee on Discipline and Ethics of the University Senate. However, when a student is dissatisfied with the decision, he/she can appeal that decision once by sending a written appeal proposal to the Chair of the Code of Ethics Committee and the proposal needs to be supported with evidence. This appeals description can be found in the Student Handbook.

For complaints relating to SU policies in which appeal and/or grievance procedures are not prescribed, the following guidelines must be followed.

Informal Resolution

A student who can demonstrate that he or she has been subject to the lack of adherence to University policy or procedure by University personnel must first seek to resolve the issue directly with the respective representative (e.g., staff member, faculty member, administrator).

If a satisfactory resolution cannot be reached between the student and University representative, or if extenuating circumstances prevent direct communication between the student and the University representative, the student should follow the appropriate chain of command.

Chain of Command

Non-Academic Informal Resolutions	Academic Informal Resolutions
Student Affairs Personnel	Academic Advisor
Student Counselor	Student Counselor
Head of Study Program	Head of Study Program
Head of Student Affairs	Head of Student Affairs
Dean	Dean
Vice Rector for Academic Affairs	Vice Rector for Academic Affairs

If, after diligent communication through the chain of command, a satisfactory resolution cannot be reached, a formal complaint may be filed following the procedures as outlined below.

Formal Complaint

Students may file a formal, written complaint after informal resolution strategies have not reached satisfactory resolution. These formal, written complaints can be submitted in writing to the Quality Assurance Officer, Sampoerna University, L'Avenue Campus, Jl. Raya Pasar Minggu Kav. 16, Pancoran, Jakarta 12780 or by email to quality@sampoernauniversity.ac.id. Formal complaints must be filed within 30 business days of the action creating the student's concern. Upon submission, the formal, written complaint will be routed to the appropriate divisional administrator for review. Upon receipt of the complaint, the administrator has 20 business days to respond. For complaints filed between semesters, additional response times may be necessary to allow for availability of the relevant parties. When additional time is necessary, students will be advised in writing of the estimated time for response within the 20 business days of receipt of the complaint. The Quality Assurance Officer is responsible for maintaining all records of formal student complaints.

STUDENT SERVICES UNITS

STUDENT SERVICES UNITS

SU has a dedicated Student Success unit that coordinates both academic and non-academic support services. These services are available to all enrolled students, and may be accessed by students directly, or upon recommendation by academic advisors, instructors, or other SU staff. The purpose of this unit is to provide students with many varied types of support, such as tutoring, counseling, accommodation for disabilities or different learning styles, as well as direct student access to resources outside the institution.

The Library and Learning Resources Center provides an array of services to students, including a place to study, prepare assignments, and locate research and leisure reading materials in comfortable, well-suited facilities and surroundings. Users can find books, magazines, periodicals, and reference resources. Audiovisual equipment, along with computers with Internet access, databases, copiers, individual and group meeting areas are available to all students. In addition to established contractual services with libraries at our partner U.S. institutions, the Library and Learning Resources Center provides access to online virtual libraries, as well as specialized databases to enhance

a full array of services as rendered by the Center. It should be noted that the SU Library holds the highest level of accreditation for a University Library in Indonesia.

The Library features a common Learning Space or “Learning Commons” which constitutes an integrated learning space (quiet zone, collaborative study area, library lounge, meeting rooms, and student lockers) as well as a fully automated library system which is accessible on or off campus.

In addition to reference and general collection services, the Library supports SU’s curriculum by providing reserved course materials. This service makes available materials that have been designated by lecturers as required readings for specific courses. Materials may include books, book chapters, articles, online materials such as e-journal articles and web sites, audiovisual materials, and faculty-developed materials such as lecture notes, sample tests, etc.

The library materials are organized into several collections:

- General Collection - General and professional books that are placed in the open shelf collection.
- Reference Collection - This collection contains general reference materials such as encyclopedia, dictionaries, yearbooks etc. The Call Numbers are preceded by “R” and they are shelved in a separate area. Reference collection is for in-house reference only.
- Reserve Collection - This collection comprises items in heavy demand or as recommended by academic staff for short-term loan. They could also be the first copy of adopted textbooks. This collection is for in-house use. However, overnight loans are also allowed from 5:00 pm to 8:00 am the next opening day. The Call Numbers are preceded with red sticker, labelled “Reserve”.
- Textbooks - These are adopted Sampoerna University textbooks borrowable for a three-day loan period. They are shelved separately and the Call Number is preceded by orange sticker, labelled “TB”

Library hours will be conducive to student schedules and will be posted online and in the Library. Online services are accessible at <http://library.sampoernauniversity.ac.id>

Other Library Services and Facilities:

- Wireless access throughout campus
- Research assistance
- iPad Loan
- Discussion Room
- Newspaper/popular magazines reading area
- Photocopy service
- New book display
- Document delivery services
- Library orientation
- Information literacy program

The destruction, loss or mutilation of any library material will also incur a fine or replacement fee equal to the current cost of the item, plus a processing fee of Rp 50,000. Overdue books or unpaid fines may also result in Academic Penalty including the deferment of paper or degree completion.

Student Affairs encompasses a wide array of co-curricular and non-academic support services that are important to ensure student success. This office organizes new student orientation, events, clubs, extracurricular activities, and counseling services for individual students and groups throughout the year. SU provides a variety of services designed specifically for eligible students, including individualized tutoring, individual and group counseling sessions, academic advising, financial aid assistance, educational and cultural field trip services, and specialized services needed by the individual student.

The Health Center provides medical treatment and consultation to students with non-emergency health issues. Staffed by medical personnel, the Center is open on a walk-in basis or by appointment. If more extensive medical treatment is required, Center staff will assist students in arranging appointments with appropriate specialists at local facilities.

Student Organizations represent the myriad student organizations and clubs that represent the interests and talents of the student body. From the Student Legislature, Academic Olympiads and a Model United Nations chapter to informal clubs to support hobbies and recreational activities, the Student Affairs staff supports student leaders to initiate activities and organizations and manage existing clubs. In addition, the Student Affairs office assists groups in identifying institutional and external funding for activities, as well as pursuing registration procedures of organizations, if necessary.

INFORMATION TECHNOLOGY SERVICES

INFORMATION TECHNOLOGY SERVICES

The Information Technology (IT) Department is responsible for delivering all aspects of Information Systems and Information Technology Services with principles to support and facilitate learning technologies required by SU.

IT Principles

- Enhance learning activities and instructional support through the effective use of technology
- Maintain a reliable, robust and secure technology environment
- Balance innovation, manageability and use of SU resources through careful planning and stewards

General Overview of IT services

IT services and system resources are delivered for students, faculty members, and staff. It is defined by engaging and collaborating with business units. The scope of services provided covers all IT related aspects required by SU. The IT Department provides the implementation and maintenance of Enterprise Application Services to support academic and management processes.

Networking and Infrastructure Services

The IT infrastructure at SU is built to support learning and teaching activities as well as supporting all administrative services at the L'Avenue campus. The campus networks are designed with Local Area Network (LAN) and Wi-Fi/ wireless access, available on all floors within the campus building.

Enterprise Application Services

Student Information Systems are available to automate the administration of academic processes consisting of student records, registration, curriculum management, courses and lecturers' records, study programs, and self-service access thru the academic portal for students and lecturers such as online class enrollment, viewing grades, viewing transcript, and viewing class schedules.

These information systems are integrated with the applications below.

- Admissions System
- Student Recruitment System
- Student Payment System (to manage student payments and financial aid)
- Facility Management System to generate and manage class schedules

Learning Technologies

- Canvas is a Learning Management System (LMS) that allow lecturers to create, manage, and share learning content and resources
- The library system is equipped to provide automated solutions for booking, borrowing and keeping inventory of book collections in the library. The system also provides online access for students and faculty members to ebooks and journals

- Microsoft Office is an office suite of applications available for student, faculty and staff. SU signed an agreement with Microsoft and this gives students, faculty and staff the right to use Microsoft Products such as Word, Excel, Powerpoint, OneNote, etc. Every registered user is provided with an Office 365 account and OneDrive storage with 50GB of capacity

Internet Connection and Wireless Campus Service

Internet access is available through wired and wireless (Wi-Fi) connections. Sufficient and manageable bandwidth is provided to support online learning and teaching applications, online exams in the computer labs, multimedia applications, and video conferencing systems

Telecommunications

Telephonic communication is conducted through an IP network (VoIP) for voice and video conference systems.

Single Sign On (SSO) Service

The SSO service is part of the infrastructure services that manages the authentication and access rights for multiple applications provided for both, academic and back office applications. Every user (students, faculty and staff) is provided an SSO account using their personalized email ID.

Classroom and Lab Technology Services

All classrooms are adapted to support a 21st Century teaching environment. Each classroom is equipped with instructional and projection technologies and has WiFi internet access and a LAN port. Also, multimedia projectors with HDMI/ VGA connectors are installed in every classroom. These technologies enable lecturers to access and utilize appropriate digital resources to enhance their teaching.

SU has five computer labs equipped with a total of 101 personal computers to support online learning and computer-based assignments. All PCs are installed with MS Windows operating system, MS Office products, and various software for computer lab work.

IT Service Desk

IT Department provides a number of support options to students, faculty and staff. These include assistance through email, by phone or in person.

IT Service Desk for faculty and staff: IT Staff Room on the 7th floor IT Counter for students: Registry Counter on the 6th floor.

Contact Information for the IT Service Desk

Address : L'Avenue Building, 6th floor
Jl. Raya Pasar Minggu Kav. 16, Pancoran,
Jakarta Selatan Indonesia

Phone : +62 21 50 2222 34 ext. 7777

Email : it.services@sampoernauniversity.ac.id

Hours of Operation : Monday – Friday, 8:00 a.m. – 5:00 p.m.

A tall, modern building with a curved facade and many windows, covered in a blue tint. The name 'SAMPOERNA UNIVERSITY' is visible at the top.

INSTITUTIONAL EFFECTIVENESS

INSTITUTIONAL EFFECTIVENESS

Instructional Program Review and Evaluation

To promote continuous quality improvement and program effectiveness, SU has established procedures to conduct quantitative and qualitative reviews of instructional programs and academic support systems. The Institutional Effectiveness Committee is responsible for establishing procedures to conduct quantitative and qualitative reviews of instructional programs to determine their success in achieving learning objectives, and of academic support services to assess their impact.

Under the guidance of the Offices of faculty and administrators review, evaluate, maintain accreditations, and modify programs for continuous improvement and student success subject to Board approval. Program outcomes are reviewed during this process.

The Vice Rector for Academic Affairs coordinates the comprehensive review of degree programs, including general education requirements. The full review considers any changes to the University's mission statement or academic policies that might have occurred relating to the academic degree and general education requirements.

Between comprehensive reviews of the degree programs and the general education curriculum, the Vice Rector for Academic Affairs establishes the procedures to be followed for considering amendments to the degree program structure or the general education program requirements. The results of the review will be forwarded through the Standing Committee for Academic Affairs and presented to the University Executive for review and/or action.

A comprehensive review of each degree program, including the associated general education core requirements, is conducted every three years. A written report of the comprehensive review shall be provided through the University Rector to the University Council. This written report should include :

- the goals and objectives of the program/discipline and its relationship to the SU mission;
- content and relevance of the curriculum;
- enrollment, placement and graduation data;
- student demographics;
- annual job openings;
- program cost information;
- student employment and student earnings;
- adequacy of faculty and staff;
- adequacy of facilities, equipment, and learning resources;
- agreements with educational institutions and other external agencies;
- plans for implementing changes and/or improvements if needed.

The results of the review may be used as the basis for any deliberations and/or decisions regarding program modification or termination.

Substantive Change

In an effort to uphold the standard reporting requirements of U.S. accrediting bodies, the University will ensure that any substantive changes to its programs, policies, or procedures are in accordance with accreditation requirements. Any such changes are also made so as to not compromise our relationship with U.S. partner institutions.

The responsibility for compliance with all relevant standards and requirements is delegated to the Vice Rector for the American College and International Relations.

Faculty making substantive changes to the University's curriculum and administrators who coordinate establishment of new locations and programs must comply with requirements of the relevant accrediting bodies and must be integrated into the planning and implementation of any substantive change action.

Closing Academic Programs, Campuses, or Off-Campus Sites

The purpose of this policy is to ensure that students pursuing degrees are able to complete their program of study in the event that a decision were made to close an educational program, campus, or off- campus site.

In the event that it becomes necessary to take this action, SU will seek to provide students with the opportunity to fully complete the term and program of study in which they are enrolled. The College's "teach out" plan will be in accordance with the policies of any governing U.S. accreditation bodies. "Teach-out" procedures for guiding the closure of educational programs, on-campus, at off-campus sites, will be equitably applied.

A tall, modern building with a curved facade and many windows, illuminated at night. The name 'SAMPOERNA UNIVERSITY' is visible on the top part of the building.

AREAS OF INSTRUCTION

AREAS OF INSTRUCTION

As students' progress through levels of courses in the discipline, they should engage with the range of learning tools and experiences that foster growth toward independent scholarly or creative activity (e.g. Bloom's revised learning domains of remembering, understanding, applying, analyzing, evaluating and creating).

General Guidelines for the Sequencing of all undergraduate coursework levels (1000, 2000, 3000 and 4000:

1st Year-Level Courses: include introductory courses or broad survey courses that assume no prerequisite knowledge beyond the skills of a first-year student. These courses satisfy General Education breadth requirements and typically prepare students for discipline entry and/or intermediate-level study.

2nd Year-Level Courses: should assume a moderate level of academic preparedness and may assume an intermediate level of discipline-specific content or methodological knowledge. These courses typically prepare students for advanced intermediate and upper-level study. They may be appropriate for freshmen and sophomores with a greater amount of autonomy and academic experience or for upper-level students who are not specializing in the field.

3rd Year-Level Courses: should assume students have a moderate to high level of academic experience and independence. Depending on the discipline, this level course may also assume a moderate to high level of discipline specific content or methodological knowledge. Such coursework should require significant academic rigor in students' approaches and assignments.

4th Year-Level Courses: should assume a high level of academic experience and independence and/or deep content and methodological knowledge in a discipline. Such coursework will probably only be accessible to majors or students with significant previous preparation in the field. Such coursework should require a high level of rigor in students' approaches and assignments.

DESCRIPTION OF COURSES

DESCRIPTION OF COURSES

BRIDGE PROGRAM: ENGLISH FOR ACADEMIC PURPOSES

DCOM0302 EAP COMMUNICATION SKILLS IV, Credit Hours: 3

Prerequisite: LOEP Listening score of 86-100. This course is designed to guide the students toward applying pronunciation, phrasing, and intonation of oral American English in communication situations such as academic and social settings.

DCOM0601 EAP GRAMMAR/WRITING IV, Credit Hours: 6

Prerequisite: WritePlacer score of 4. High-intermediate course introduces paragraph writing and mastery of complex grammatical structures (e.g. modals, clauses, quotes & reported speech, etc.)

GCOM1301 EAP COMPOSITION I, Credit Hours: 3

Prerequisite DCOM0601 or WritePlacer score of 5. A composition course that addresses mastery of paragraph writing; effective editing and an introduction to essay development are also addressed.

GCOM1305 Composition II, Credit Hours :3

Composition II is designed to further develop a student's composition skills by building on the rhetorical modes/strategies learned in Composition I. The course requires students to observe the conventions of Standard American English and create documented essays, demonstrating the student's ability to think critically and write analytically.

Selected texts supplement the course and provide topics for discussion and assignments. Students use library research methods for primary and secondary sources to produce MLA style documented and well-argued research essays and/or projects.

DCOM0303 EAP READING IV, Credit Hours: 3

Prerequisite: LOEP Reading score 90-113. This high intermediate course emphasizes vocabulary, critical comprehension & study skills.

GCOM1302 EAP ADVANCED READING, Credit Hours: 3

Prerequisite: DCOM0303 or LOEP Reading score of 114-120. An advanced reading course that emphasizes critical comprehension and vocabulary skills.

GENERAL EDUCATION COURSE DESCRIPTIONS

Area 1. Communications (9 Credits)

GCOM1304 Composition I, Credit Hours: 3

GENG1301 is a university parallel course that requires students to learn and practice writing by creating original compositions, exploring basic rhetorical forms such as narration, exposition, and argumentations. Students will also develop research skills and learn to incorporate research material through the writing process. For non-exempt students, placement in GENG1301 is determined by both standard and departmental assessment tests. This is a writing credit course that focuses on extensive writing and revision.

GCOM1305 Composition II, Credit Hours: 3

Composition II is designed to further develop a student's communication skills by building on the writing and critical thinking strategies learned in GENG1301. The course requires students to observe the conventions of Standard American English and create documented essays, demonstrating a students' ability to think critically and communicate analytically. Selected texts supplement the course and provide topics for discussion and assignments. Students use library research methods for primary and secondary sources to produce MLA styledocumented and well-argued research essays and projects. This is a writing credit course.

GCOM1306 Introduction to Speech Communication, Credit Hours: 3

This course is designed to provide students with fundamental training and practical experience for researching, organizing, and delivering speeches in public situations. Topics include: audience analysis, speech anxiety, critical listening, and preparation and delivery of informative, persuasive, and other possible types of public speeches in various cultural context with emphasis on academic and scholarly research. Students will also learn to effectively incorporate audio and visual aids/technologies for effective speeches. This is an international/ intercultural competency course.

IENG33110 Technical Writing, Credit hours: 3

The focus of this course is to analyse the communication practices used in professional settings that constitute technical writing. In addition, students will examine how rhetoric affects those communication practices, and will use their own assumptions to make effective choices about the form and content of the technical documents. Students will learn several important skills and concepts that will provide them with basic workplace literacy. Ideally, this understanding will help students to make appropriate choices for their own professional communication.

Besides writing for their profession, the second half of the semester will introduce students to writing for a proposal following adequate methodology pertinent to their major. Students will get acquainted with academic writing genre, starting from the meaningful and sequential train of thought up to supplying evidence of their statement.

Area 2. Humanities (6 Credits)

GHUM1301 Pancasila, Credit hours: 3

(National requirement) This course examines the material Introduction to Understanding Pancasila, Historical Review of Pancasila, Pancasila as a View of Life and the Basics of the State, Pancasila as a Philosophical System, Pancasila as a State Ideology, Pancasila as an Ethical System, and Pancasila as a Basic Value in the Development of Science. Pancasila was formulated at the time of Indonesia's independence in 1945, intended to alleviate religious and regional tensions and promote unity and pluralism.

GHUM 1207 Kewarganegaan, Credit hours: 2

(National requirement) This course is intended to qualify students with basic knowledge and skills as citizens who have national spirit and insight, have character, love the homeland, are democratic, obey the law, and have the ability to appreciate diversity, as the foundation for being able to contribute to the development of Indonesia.

GHUM1302 Bahasa Indonesia, Credit hours: 2

(National requirement) Bahasa Indonesia course is a general basic course that aimed to help the student in mastering Bahasa Indonesia effectively and productively. Students are expected to be able to understand and use bahasa Indonesia on written or oral text in various context. Competencies that will be mastered by students are attitude and knowledge competency. In attitude competency, students are expected to show a positive attitude, actively contribute, responsibility, and be able to solve problems.

In knowledge competency, students are expected to be able to master knowledge of bahasa Indonesia and article writing. Thus, language skills that will be practiced in this course are reading, listening, writing, and speaking skills in relation to knowledge of bahasa Indonesia and article writing.

GHUM1303 World Religion, Credit hours: 3

This course is a descriptive examination of the world's most popular religions. World religion is a writing credit course. Student must earn a minimum grade of C to meet the requirements of the Gordon Rule for writing. World religion meet is the international / intercultural competency requirement.

GHUM2304 Introduction to Literature, Credit Hours: 3

This course exposes students to the study of literature and a range of widely recognized authors and works. Students will examine and interpret a diverse and representative body of works from genres such as short stories, poetry, creative non-fiction, plays, and novels. Upon successful completion of this course, students will be able to demonstrate an understanding of fundamental concepts and ideas in each of the major literary forms.

VCDD3345 Indonesian Art History, Credit hours: 3

The Indonesian Art History course emphasizes on a deep conceptual understanding of Indonesian art historical concepts. Students will develop the essential skills of visual and contextual analysis. By examining works of art from Indonesia's Diverse culture and the relationships among these works, students develop an understanding of Indonesian artistic traditions. Students analyse works of art in their contexts, considering issues of patronage, gender, politics, religion, and ethnicity.

Area 3. Social and Behavioral Sciences (6 Credits)

GSOC1301 Principles of Macroeconomics, Credit Hours: 3

An introductory course in macroeconomic principles covering basic economic problems and concepts. Topics discussed and analyzed include basic economic problems of unemployment and inflation, as well as fiscal and monetary policies. Students will recognize the role of households, businesses and governments in the market economy and in their own lives. This is a writing credit course with International/Intercultural content.

GSOC2303 General Psychology, Credit Hours: 3

General Psychology reviews the scientific principles related to human behavior and mental processes. Topics include the scientific method, neuroscience, learning, memory, and thinking, emotions, motivation, and health, life span development, personality, psychological disorders, and therapies, and social psychology. This is a writing credit course with International/Intercultural content.

GSOC2304 Social Problems, Credit Hours: 3

This course is an examination of the major social problems found in our changing social environment. More specifically, students will be introduced to a variety of topics which may include inequality based on class, race, ethnicity, education, age; violence in society; the changing family; social problems related to gender and sexual behavior; global social problems. This is a writing credit course with International/Intercultural content.

GSOC2306 U.S. History Since 1877, Credit Hours: 3

This survey course of American history since 1877 provides students with a general history of the political, economic, cultural, and social development of American society. This course will focus on a myriad of themes including but not limited to the basic principles and practices of American democracy, the United States Constitution and its application, landmark Supreme Court cases, landmark legislation, and landmark executive

actions that have had an impact on the shaping of modern-day America. Special emphasis will also be placed upon U.S. expansion, progressivism, foreign relations, social movements, and political developments at the turn of the twentieth century and beyond. Students will also study the introductory concepts of history reading, writing, and methods.

Environmental Ethics ENGR3303, Credit hours: 3

This course provides an introduction to environmental ethics in Indonesia. Students will be able to investigate and seriously consider how and why we should live as morally responsible toward nature. Students will also examine critical theoretical approaches, key thinkers, and social movements in contention over competing environmental values.

Area 4. Natural Science (9 Credits)

GSCI1201 Total Wellness, Credit Hours: 2

Total Wellness emphasizes the importance of knowledge, attitudes, and practices relating to personal wellness. It is a course designed to expose students to a broad range of issues and information relating to the various aspects of personal wellness including physical, social emotional, intellectual, spiritual and environmental wellness. This course integrates personal wellness and fitness in both a classroom and exercise environment. Evolving current topics such as nutrition, disease prevention, stress reduction, exercise prescription, and environmental responsibility are integrated to enable the student to understand the lifelong effects of healthy lifestyle choices. This is an International/Intercultural competency course.

GSC1302 Introduction to Environmental Science, Credit Hours: 3

Study of the physical environment, its relationship with the biosphere, and man's impact upon natural systems. This course includes ecological systems, Florida environments and geology, pollution and environmental regulations, renewable and nonrenewable resources, and sustainability.

This course meets General Education requirements in the Biological and Physical Sciences. Placement by Testing Department.

GSCI1303 General Chemistry I, Credit Hours: 3

This is the first course in a two-semester sequence, GCHM1301 and GCHM2302. This sequence includes two laboratories: GCHM1101 to be taken concurrently with GCHM1301 and GCHM2302L to be taken with GCHM2302. This sequence is for students who have already had high school chemistry. Topics covered include: chemical measurements, stoichiometry, atomic structure periodic table, chemical bonding, inorganic compounds, nomenclature, formula writing, gases, liquids, solids, solutions acid-base chemistry and ionic reactions and some descriptive chemistry of non-metals. To enroll, it is strongly recommended that students have had previous chemistry at the high school or college level.

GSCI1103L General Chemistry I Laboratory, Credit Hours: 1

Laboratory experiments to accompany GSCI1303.

GSCI1308 General Biology

This course introduces the concept and principles of biology which include the structure of cell and function, the principles of biochemical, energy transfer, genetics, mitosis & meiosis, evolution, organism (prokaryotes, protists, fungi, plants, and animals), and the ecosystem.

GSCI1108L General Biology Lab

General Biology Lab introduces students to perform the practical exercise and scientific methods as a tool to demonstrate basic concept presented in general biology course (respiration, photosynthesis, mitosis, meiosis, mechanism of heredity, studying structure and function of prokaryotes, protists, fungi, plants, and animals).

GSCI1405 General Physics with Calculus I, Credit Hours: 4

General Physics with Calculus I is the first course in a two-semester sequence outlining mechanics, properties of matter, heat and sound. Algebra, trigonometry, geometry and vector methods will be used in the quantitative description of these topics.

GSCI1105L General Physics with Calculus I Laboratory, Credit Hours: 1

General Physics with Calculus I Laboratory is a laboratory which allows students to be able to collect and analyze data in a variety of experiments covering topics covered in its companion course General Physics with Calculus I. Students will create experiment reports using analysis in calculus.

GSCI1307 Microbes & Society, Credit hours: 3

This course introduces that microbe play an important role in societies. It includes the role of microbes in the biosphere, agriculture, industry, biotechnology, and the relationship of microbes with humans, diseases and sanitation. It will also focus on the positive and negative effects of microbes in Indonesia.

Area 5. Mathematics (6 Credits)**GMAT1301 College Algebra, Credit Hours: 3**

College Algebra is a course in which students will learn the concepts and applications of topics such as solving, graphing and applying linear, and quadratic equations, and inequalities; exponential and logarithmic properties; linear, quadratic, rational, absolute value, square root, cubic, and reciprocal functions; operations, compositions, and inverses of functions; and systems of equations and inequalities.

GMAT1512 Corequisite College Algebra, Credit hours: 5

This course meets the needs of students with myriad levels of mathematical experience by providing support for learning prerequisite skills. This course is delivered as a combination of lecture along with structured activities intended to give students the experience of doing mathematics on their own or in groups with instructor guidance. The algebra objectives of the course include factoring polynomials; simplifying radicals; operations on rational expressions; writing equations of lines and circles; solving and graphing the solutions of linear and quadratic inequalities; solving systems of linear equations; solving quadratic, absolute value, radical, rational, exponential, and logarithmic equations; and properties and analysis of relations, functions and their graphs. Applications appear throughout the course.

GMAT 1511, Precalculus algebra and trigonometry credit hours; 5

This course is designed to satisfy the dual requirements of trigonometry and precalculus algebra thus preparing the student for the study of calculus. In this course, the student will study various function families (e.g., polynomial, exponential, logarithmic, trigonometric) from both analytic and graphical viewpoints, and will use them to model real-life situations. The student will be exposed to additional topics that will deepen their mathematical understanding, including systems, matrices and determinates, sequences and series, parametric equations, and polar coordinates and equations.

GMAT1304 Calculus for Business, Social & Life Sciences, Credit Hours: 3

This is a general education course which includes the college-level skills of calculus such as: functions, graphs, limits, differentiation, integration, average and instantaneous rates of change, and other applications. Recommendation from the Mathematics Department or at least a grade of a "C" in the prerequisite coursework required.

GMAT1505 Calculus & Analytical Geometry I, Credit Hours: 5

This is the first of a three-course sequence in calculus. Students may need to a graphing calculator throughout the sequence of courses. Topics include: analytic geometry, functions, limits, continuity, derivatives and their applications, transcendental functions, anti-derivatives, and definite integrals. Certain sections of this course may require the use of a graphing calculator. Recommendation from the Mathematics Department or at least a grade of a "C" in the prerequisite coursework required.

GMAT1310 Statistics, Credit Hours: 3

A first course in statistical methods including such topics as collecting, grouping, and presenting data; measures of central tendency, position, and variation; theoretical distributions; probability; test of hypotheses; estimation of parameters; and regression and correlation. Use of statistical computer software and/or a scientific calculator (capable of performing 2-variable statistics) will be required. Recommendation from the Mathematics Department or at least a grade of "C" in the prerequisite course is required

Business Pre-requisite Course Descriptions**GBUS1301 Introduction to Business, Credit Hours: 3**

This course provides a basic study of business activity and how it relates to our economic society. Topics covered include how businesses are owned, organized, managed and controlled. Course content emphasizes business vocabulary, areas of business specialization, and career opportunities.

GBUS1302 Principles of Accounting I, Credit Hours: 3

This course provides an introductory study of the fundamental principles of financial statement preparation. It introduces students with the accounting process, i.e. identification, recording, reporting, and preparing financial statements. Students start learning about relevant accounting standards, e.g. IFRS, PSAK, and US GAAP. Pre-requisite(s): None

GBUS1303 Principles of Accounting II, Credit Hours: 3

As the continuation of Principles of Accounting I, this course covers more topics about financial accounting. They are included current and long-term liabilities, partnerships, fixed and intangible assets, investment, statements of cash flow, and simple financial statement analysis. Pre-requisite(s): GBUS1302 Principles of Accounting I

GBUS2304 Managerial Accounting, Credit Hours: 3

This course deals with planning, controlling, as well as costing product, services, and customers. It focuses on management accountant issue such as assisting managers to make better decision throughout the concept of "different cost for different purposes". By focusing on basic concepts, analyses, uses, and procedures, instead of procedures alone, it can be recognized that cost and management accounting as a managerial tool for business strategy and implementation. This course gives the accounting students the analytical and problem-solving skills such as excel to leverage available information technology. Pre-requisite(s): GBUS1303 Principles of Accounting II

GBUS1305 Computer Applications, Credit Hours: 3

Desktop computing proficiency is increasingly important in today's business world. This course is designed to assist students in validating their knowledge and ability to use word-processing, spreadsheet, and presentation graphics applications. Through case studies, students will learn to develop comprehensive solutions to various types of problems. Integration between applications will be emphasized. Pre-requisite(s): None

GBUS1105 Computer Application Lab, Credit Hours: 1

Desktop computing proficiency is increasingly important in today's business world. This course is designed to assist students in validating their knowledge and ability to use database application. Through case studies, students will learn to develop comprehensive solutions to various types of problems. Integration between applications will be emphasized.

ACCT1326 Principles of Macroeconomics, Credit Hours: 3

The course covers basic economic problems and concepts. Topics discussed and analyzed include basic economic problems of inflation, unemployment, monetary and fiscal policies, and economic growth. Students will recognize the role of businesses and governments and households in the market economy and in their lives. Pre-requisite(s): None

GBUS2307 Communication in the Workforce, Credit hours: 3

Designed to develop the communication skills necessary to speak and write clearly in a business environment, including business correspondence, an oral presentation, effective verbal and nonverbal communication, and listening.

ACCT1327 Personal Finance, Credit Hours: 3

This course various areas of personal economic problems with which all individuals must contend. Students will learn about buying on credit, renting vs home ownership, using bank services, borrowing money, and investing savings; selecting from various types of insurance coverage; obtaining investment information, investing in bonds and stocks; Social Security; income taxes; retirement planning and annuities; Medicare; and estate planning, wills, and trusts. Pre-requisite(s): GMAT1304 Calculus for Business, Social & Life Sciences

GBUS2304 Managerial Accounting, Credit Hours: 3

This course provides students with an application of management accounting concepts related to decision making, planning and control. It introduces various management accounting tools, such as job and process costing, activity-based costing, incremental analysis, budgeting, capital investment, and variance analysis. Students need to learn apply cost-benefit analysis in making decisions and preparing recommendation. Pre-requisite(s): GBUS1303 Principles of Accounting II

Engineering and Technology Pre-requisite Course Descriptions

GENG1301 Introduction to Engineering, Credit Hours: 3

This course is a basic introduction to engineering. It will explore the various engineering fields, engineering problem solving, and basic math and physics used by engineers. Other topics such as safety, ethics, and engineering communications will also be addressed.

GMAT2506 Calculus & Analytical Geometry I, Credit Hours: 5

This is the second of a three-course sequence in calculus. Topics include techniques of integration, conics, polar coordinates, indeterminate forms, L'Hopital's Rule, proper integrals, infinite series, parametric equations, improper integrals, volume, arc length, surface area, work, and other applications of integration. A graphing calculator may be required in certain sections of this course. Recommendation from the Mathematics Department or at least a grade of a "C" in the prerequisite coursework required.

GMAT2507 Calculus & Analytical Geometry III, Credit Hours: 5

This is the third of a three-course sequence in calculus. Topics include vectors in 3 space, 3-dimensional surfaces, multivariate functions, cylindrical and spherical coordinates, multiple integrals, partial derivatives, vector fields, a graphing calculator may be required in certain sections of this course. Recommendation from the Mathematics Department or at least a grade of a "C" in the prerequisite coursework required.

GMAT2308 Differential Equations, Credit Hours: 3

Topics include the classification, solution and application of differential equations, including numerical methods, Laplace transforms, linear systems, and series solutions.

GMAT2309 Linear Algebra, Credit Hours: 3

A first course in linear algebra, emphasizing the algebra of matrices and vector spaces. Recommended for students majoring in mathematics or related areas.

GSCI2304 General Chemistry II, Credit Hours: 3

This course is to be taken concurrently with GSCI2104L. Topics covered include thermodynamics, kinetics, equilibrium, electrochemistry, coordination chemistry, descriptive chemistry of metals, nuclear chemistry and an introduction to organic chemistry.

GSCI2104L General Chemistry II Laboratory, Credit Hours: 1

Upon successful completion of this course, the students should be able to use appropriate laboratory equipment to safely perform laboratory experiments that relate to the topics covered in GSCI2304 or to collect data accurately and to use those data to calculate a reasonable answer or come to a logical conclusion.

GSCI1405 General Physics with Calculus I, Credit Hours: 4

GPHY1405 is part one of a comprehensive course in physics outlining mechanics, heat, and wave motion using analysis in calculus.

GSCI1105L General Physics with Calculus I Laboratory, Credit Hours: 1

GSCI1105L is a laboratory that allows students to be able to collect and analyze data in a variety of experiments covering topics covered in its companion course GSCI1405. Students will create experiment reports using analysis in calculus.

GSCI2406 General Physics with Calculus II, Credit Hours: 4

GPHY2406 is part two of a comprehensive physics course outlining electricity, magnetism and optics using analysis in calculus.

GPHY2106L General Physics with Calculus II Laboratory, Credit Hours: 1

A series of physics laboratory experiments chosen to coincide with the lecture course GSCI2406. The course will include topics in electricity, magnetism, and optics. One 2-hour class meeting per week. A laboratory fee is charged.

Psychology Program

PSYC1301 Introduction to Psychology, Credit Hours: 3

This course offers several discussions that become fundamental things from psychology study. The study will deliver the material by introducing basic psychology in general, which aims to help students better understand various psychology courses. This course will cover several topics, including psychology history, biopsychology, sensation, and perception, learning theory, intelligence theory, motivation theory, personality theory, and personal development theory. Additionally, this lecture will look at current concerns and developments in societal and psychological discourse.

PSYC1302 Developmental Psychology I, Credit Hours: 3

Survey of research and theory in child development. This course examines age-related change in the social, emotional, cognitive, and linguistic domains from infancy to adolescence. Emphasizes the exploration of empirical literature in psychology, biology, and social science as it relates to developmental issues.

PSYC1303 Career Exploration and Professional Development, Credit Hours: 3

In this course, Psychology majors explore the many and varied career pathways that they may encounter with a bachelor's degree in the field. This course is designed to allow students to apply psychology-specific content and skills to career goals. Students will be challenged to articulate, apply, and exhibit skills derived from psychology to best prepare them for successful careers in the workforce.

This course is an Engaged Learning course. It is designed to guide students through experiential learning and reflection on that experience to prepare students for applying what they've learned beyond the classroom and into their future careers.

PSYC1310 Psychodiagnostics I (Observation and Interview), Credit Hours: 3

This course offers a general introduction to psychodiagnostics. It provides a basic knowledge of the tools for psychological assessment. This course will particularly familiarize students with theoretical knowledge as well as practical details of observation and interview, which are the basic tools in psychological assessment.

PSYC1306 Developmental Psychology II, Credit Hours: 3

This course will explore change and continuity in the biological, psychological, and social processes associated with adulthood, with an emphasis on late life. Students will have the opportunity to engage older adults in conversation, and experience first-hand the broad range of individual differences that occur with aging.

PSYC1304 History and Philosophy of Psychology, Credit Hours: 3

The development of the discipline of psychology, primarily in the last hundred years, has been examined in the context of significant events occurring in society and in other disciplines. Discussion and critical evaluation of psychology as a profession and a science and of the major schools of thought: structuralism, functionalism, associationism, behaviorism, Gestalt psychology, psychoanalysis, and cognitive psychology.

PSYC2309 Phenomenology and Existentialism, Credit Hours: 3

This course provides philosophical foundations based on phenomenological philosophy (phenomenology) and existential philosophy (existentialism). Furthermore, it gives philosophical foundations based on the impacts of several theoretical psychological perspectives. Finally, this course also explains the direct effect of phenomenology and existentialism on the phenomenology approach and existentialism in qualitative observation.

PSYC2311 Psychodiagnostics II (Intelligence Assessment), Credit Hours: 3

This course provides an overview of intelligence assessment relating to adults and children. It provides history, development, goal, and the use of intelligence assessment in broad settings. This course will particularly familiarize students with theoretical knowledge as well as practical details of intelligence assessment for adults and children.

PSYC2308 Research Methods I (Quantitative), Credit Hours: 3

Psychology major will gain experience in a range of psychological research methods. This course is intended for students who have completed the Statistics course. In this course, students are guided to understand the quantitative research process, starting from problem formulation, research variable formulation, literature research, data collection techniques, sampling procedures, interpreting research results, preparing proposals and research reports.

PSYC2326 Industrial and Organization Psychology, Credit Hours: 3

This course offers the application of the principles of psychology to industrial and social organizations, including personnel, human factors, organizational and consumer psychology.

PSYC2312 Research Method II (Qualitative), Credit Hours: 3

This course provides a generic introduction to the knowledge, skills, and tools that a student will require when undertaking a qualitative research study in education. In particular, the subject focuses on the areas of data collection and analysis. Emphasis is given to understanding, evaluating, and gaining experience in the multiple processes of gathering, managing, exploring, interrogating, and interpreting textual data. This will include practical sessions in using and evaluating Qualitative Data Analysis Software. Students will be encouraged to apply their skills to data that is relevant to their specialist needs.

PSYC2313 Introduction to Psychology Test, Credit Hours: 3

This course introduces the meaning, process, and methods of psychodiagnostics, as well as the benefits in psychological examinations. This will include general orientations of psychological diagnostics, principles, concepts of using tests and the limitations of them as tools.

PSYC2221 Code of Ethics, Credit Hours: 2

This course provides students with an overview of ethical issues that arise in psychological practice, teaching, and research. Students will be familiarized with the codes of ethics (e.g. Indonesian Psychological Association (HIMPSI)'s Code of Ethics and American Psychological Association (APA)'s Code of Ethics) and ethical guidelines. It applies both to psychology academics and psychologists.

PSYC2333 Child and Adolescence Psychology, Credit Hours: 3

Child and Adolescence Psychology is a subject that has goals examining complex processes of growth and development during childhood and adolescence. The materials include developmental milestone, attachment theory, cognitive development, social development, emotional development, psychopathology, parenting and family dynamics, the influences of culture on parenting and development and assessment and intervention for child and adolescence

PSYC2334 Promoting Healthy Aging, Credit Hours: 3

Promoting Healthy Aging is a class that will provide students with knowledge and skills for helping students understand how to help growing older individuals to enjoy their late adulthood years, with physical, emotional, and above all psychological health, with all social and cultural repercussions.

UPPER DIVISION COURSE DESCRIPTIONS

UPPER DIVISION COURSE DESCRIPTIONS

The following pages contain the descriptions of all courses offered by SU. The courses are listed in alphabetical order by course rubric (four letter abbreviation) within each Faculty.

Education Core Courses

EDUC1301 Foundations of Teaching and Learning, Credit hours: 3

This course provides beginning foundations (professional, legal, ethical, multicultural) for understanding learners, teaching environment, the governance of the Indonesian school system, and current issues related to the teaching profession.

EDUC1302 Educational Psychology, Credit hours: 3

This course introduces concepts of major theories and approaches to the scientific study of behavior and mental processes. Physical, Cognitive, Social and Emotional; Learning Theories; and Educational Planning and Practice will be discussed in this course.

EDUC1303 Educational Research Methodology I, Credit hours: 3

This course introduces foundations of educational research methodology and research designs that helps students to develop educational research proposals. **Pre-requisite:** Foundations of Teaching and Learning.

EDUC2304 Social Emotional Learning, Credit hours: 3

This course provides theoretical knowledge of social and emotional competencies impacts on learning behaviors which includes how learners can understand and manage emotions, set and achieve positive goals, feel and show empathy for others, establish and maintain positive relationships, and make responsible decisions. **Pre-requisite:** Foundations of Teaching and Learning.

EDUC2305 Social Foundations of Education, Credit hours: 3

Developing an understanding on how teachers' work is influenced by social and structural forces, school and community contexts, and their own life histories and belief systems. **Pre-requisite:** Foundations of Teaching and Learning.

EDUC3306 Educational Technology, Credit hours: 3

Investigating the use of computer-based technology as a pedagogical tool and its theoretical frameworks to improve the teaching and learning process. Exploring productivity tools, educational software, and web-based information in order to develop a professional electronic portfolio as a showcase of individual educational technology knowledge and skills, and reflection on effective technology usage in learning and teaching. **Pre-requisite:** Foundations of Teaching and Learning.

EDUC3307 Individual Differences, Credit hours: 3

Focusing on the current and historical understanding of individual differences in inclusive school settings. Implementing the knowledge of individual differences in planning and facilitating learning sessions. **Pre-requisite:** Foundations of Teaching and Learning.

EDUC3308 Educational Research Methodology II, Credit hours: 3

Methods and strategies for quantitative and qualitative data collection and data analyses. **Prerequisite:** Educational Research Methodology I, and Statistics.

EDUC3309 Advanced Educational Technology, Credit hours: 3

Identifying and evaluating some educational technology innovations such as multi-user virtual environments, digital teaching platforms and augmented realities to support the improvement of teaching and learning. Designing some educational technology tools to create an effective and meaningful classroom environment. **Prerequisite:** Educational Technology.

EDUC3310 Seminar, Credit hours: 3

This course is a capstone experience, in which the prospective students prepare for their Capstone Project Proposal. There are three types of capstone projects which are a thesis, a set of instructional design, or teaching/learning materials. At the end of this course all prospective teachers must defend their proposal by ensuring that they have provided a strong rationale for conducting their project, are familiar with the literature related to their project, and have a clear idea of how the project will be designed. **Pre-requisite:** Educational Research Methodology II.

EDUC4311 Microteaching, Credit hours: 3

The course provides opportunities for teacher candidates to develop, practice, and reflect on their teaching skills in real classroom contexts by aligning with the School Experience Program that requires them to teach at primary or secondary schools. At the end of the course, the teacher candidates are expected to comprehend the teaching skills that can be implemented in the future work. **Prerequisite:** Curriculum & Material Development (Mathematics or English).

EDUC4412 Social Internship Program / Kuliah Kerja Nyata, Credit hours: 3

The course will facilitate students to immerse in society by having a project to contribute to the solution of real life problems. This course requires pre-service teachers to accomplish at least 124 credits before.

EDUC4313 School Experience Program (SEP)/ Internship, Credit hours: 3

SEP is uniquely designed by Faculty of Education Sampoerna University to promote contextual learning where students can apply their knowledge and skills in schools, learn from professional teachers, observe and experience how theories and principles of teaching and learning Mathematics and English Teaching are put into practices, and reflect upon their learning and career orientations. SEP is conducted every semester and through which senior students work as interns in school and they can also collect primary data for their Capstone projects.

EDUC4313 School Experience Program (SEP)/ Internship, Credit hours: 3

A final project which students must complete prior their graduation. They are required to demonstrate their abilities to apply the knowledge and skills to realworld problems in a scholarly manner. Pre-requisite: Statistics, Educational Research Methodology II, Seminar, Academic Writing.

English Language Education Curriculum

ELTE1301 Writing Convention and Grammar Analysis, Credit hours: 3

This course examines the fundamentals of effective and eloquent writing and professional editing. It is designed particularly for humanities and teacher education majors who are interested in careers as professional writers, as editors, or as teachers of writing. However, the course is also useful to other students who are interested in improving their own writing or those who are pursuing careers that may require them to revise and edit written texts.

ELTE 1302 Planning, Assessment, and Evaluation in English Language Teaching, Credit hours: 3

Provide opportunities for students to study the different approaches to learning, teaching and assessment in English Language Teaching.

It helps students design a lesson and assessment in their own contexts. **Prerequisite:** Foundation of Teaching and Learning.

ELTE 1303 Teaching English as a Foreign Language 1

Pedagogy of skills (Listening, Speaking, Reading, and Writing), pronunciation, and grammar instruction in an integrated and a holistic manner. Hands-on experience in teaching those skills needs to be done during the course. **Pre-requisite:** -

ELTE2304 Introduction to the Study of Language, Credit hours: 3

A foundation in understanding the nature of language and language use for further study of language and its applications. A conceptual framework for thinking about and discussing language knowledge as well as basic skills of analysis and description with various levels of language being considered: phonology, morphology, syntax, the lexicon, semantics, and pragmatics.

ELTE2305 Language Acquisition & Development, Credit hours: 3

Introduction to language acquisition, which includes how all healthy children acquire their L1 and how languages are learned by L2 learners, both children and adults.

ELTE2306 Classroom Language Strategies, Credit hours: 3

Developing skills and strategies needed for teaching in English which includes explaining, questioning, probing, and facilitating classroom discussions. **Prerequisite:** Teaching English as a Foreign Language 1.

ELTE2307 Teaching English as a Foreign Language II, Credit hours: 3

The course aims to give some knowledge on integrating intercultural communicative competence and multiliteracy and incorporating the use of low and high technology more for increasing media and digital literacy.

ELTE2308 Literature for Younger Children & Older Children, Credit Hours: 3

This course focuses on examining literacy's concepts and instructional strategies along children's developmental stages from grade K to 8, covering the emergent to basic literacy skills, in particular, the core components of literacy instructions which consists of print awareness, literacy environment at home, phonology awareness, vocabulary acquisitions, variety of strategies of reading comprehensions, as well as balanced literacy strategies.

ELTE2309. English for Young Learners, Credit hours: 3

This course aims at exploring characteristics of young learners and methods in creating engaging activities which embed the content of other subjects to English lessons. **Pre-requisite:** -

ELTE3310 Discourse Analysis and Sociolinguistics, Credit hours: 3

This course highlights the analysis of the linguistics features and A systematic investigation of human language in relation to the social world, to fit in certain contexts, involving critical sensitivity to questions of power, ideology, and inequality as reproduced in classroom text and talk, and teaching English as an international language.

ELTE3311 Contemporary Approaches in ELT, Credit hours: 3

Discussion and analysis of the various issues and trend in the current ELT world to broaden and prepare students to be professional teachers. **Pre- requisite:** ELT Methodology.

ELTE3312 Literacy, Culture & Development of Critical Readers, Credit Hours: 3

Literacy, Culture, and Development of Critical Readers equip students with critical reading and thinking skills as parts of the academic skills needed in the era of change and uncertainty, in which cultures seem to have become globalized and 'homogenized', yet at the same time remain complex and

incommensurate. The abilities to search for information, determine its validity and accuracy, evaluate, and synthesize the information provided by the digital world in its abundance, as well as the ability to contextualize the information in its cultural specificity, play a strategic role across different sectors in society.

ELTE3313 Curriculum and Material Development, Credit hours: 3

Discussion on curriculum and material development theories and practice in the field of English Language Teaching either in national or international context. **Pre- requisite:-**

ELTE 3313 English for Specific Purposes, Credit hours: 3

This course is a type of English Language Teaching (ELT) that focuses on a particular career (like hospitality industries, law, and banking) and business in general. In this type of ELT, learners will need to be exposed to specific linguistic aspects that relate to their professions. In addition, the course also applies project-based learning (PBL) that aims to give the learners experiential learning on how to apply the theories into practice.

ELTE 3315 Technology in Language Learning, Credit hours: 3

Blended. This course aims to explore the connection between principles of learning English and the implementation of current Internet and multimedia technologies. This skill is crucial to support the development of communicative and literacy competence of the teacher candidates who are engaged in a process of improving their language proficiency. **Prerequisite:** Educational Technology.

ELTE3316 Literacy & Learning in Content Area (Multiliteracies), Credit Hours: 3

The course aims to extend teachers' knowledge and skills to the processes, products, and values of literacy in various areas of the curriculum, with particular emphasis on comprehension, vocabulary, and disciplinary literacy. With a nod to the critical role of literature in one's literacy development, this course also

requires teachers to engage with literature and have direct experience to apply literature for literacy teaching (literature-based literacy teaching).

ELTE4320 Advanced English Skills, Credit hours: 3

This course focuses on developing original academic arguments, using appropriate textual evidence to support the arguments, the ability to use counterarguments to temper and strengthen ideas, and developing a sophisticated and elegant prose style. Participants are expected to generate research writing and to present their thoughts structurally. **Pre-requisite:** Seminar.

Mathematics Education Curriculum

GMAT1303 Precalculus Algebra, Credit hours: 3

Fundamental course for higher level of mathematics courses in university. Topics include functions, polynomial and rational functions, sequence and mathematical induction, system of linear equations, and conic sections.

MTED1301 Teaching and Learning of Mathematics I, Credit hours: 3

Enable teacher candidates to have a more critical point of view of the teaching and learning of mathematics by discussing and reflecting on principles of teaching & learning mathematics, various theories of learning, what mathematics is; and mathematics thinking skills. Prerequisite: Foundations of Teaching and Learning.

MTED1302 Differential Calculus, Credit hours: 3

The first course of a three course sequence in Calculus. Topics include: limits, the derivative, and the application of derivative. The course will keep in balances between concepts and skills (techniques), theory and modeling (application), symbolic manipulation and technology. **Prerequisite:** Precalculus Algebra.

MTED1303 Planning, Assessment, and Evaluation in Teaching Mathematics, Credit hours: 3

Provide opportunities for students to study the different approaches to learning, teaching and assessment in order that they can implement appropriate instructional strategies in planning, assessment, and evaluation. **Prerequisite:** Foundation of Teaching and Learning

MTED2304 Geometry, Credit hours: 3

Provide basic knowledge of common geometric figures properties and their application, and proving skills in mathematics. **Prerequisite:** Precalculus Algebra.

MTED2305 Teaching and Learning of Mathematics II, Credit hours: 3

Provide teacher candidates with opportunities to examine why and how to teach various topics in mathematics such as number, logic, algebra, geometry, trigonometry, probability and statistics, and calculus. **Prerequisite:** Teaching and Learning Mathematics I.

MTED2306 Integral Calculus, Credit hours: 3

The second of a three-course sequence in calculus. Topics include integration, applications of integration, and techniques of integration. The course will keep in balances between concepts and skills (techniques), theory and modeling (application), symbolic manipulation and technology. **Prerequisite:** Differential Calculus.

MTED2307 Number Theory, Credit hours: 3

Exploring many topics of elementary number theory, their history and applications, students are directed to develop their proof-writing skills step by step. Some topics: mathematical induction, divisibility and primes, the Euclidean algorithm, linear Diophantine equations, modular number systems. **Prerequisite:** Precalculus Algebra.

MTED2308 Sequence & Series of Functions, Credit hours: 3

The third of a three-course sequence in Calculus. Topics include L'Hopital's Rule, improper integrals, and Infinite Series. The course will keep in balances between concepts and skills (techniques), theory and modeling (application), symbolic manipulation and technology. **Prerequisite:** Integral Calculus.

MTED3309 Mathematics Curriculum and Materials Development, Credit hours: 3

Developing the skills to use the official mathematics curriculum to develop an enacted mathematics curriculum and using the principles of instructional design to create instructional materials, especially teaching modules. **Prerequisite:** Teaching and Learning of Mathematics II.

MTED3310 Problem Solving and Project-Based Learning in Mathematics, Credit hours: 3

Exploring problem-solving and project based learning (PBL) in the teaching and learning of mathematics. Some topics: definition, why, how, and assessment of problem-solving and PBL. **Prerequisite:** Teaching and Learning of Mathematics II.

MTED3311 Ordinary Differential Equations, Credit hours: 3

An introductory course on ordinary differential equations. some topics: definition and terminology, initial-value problems, first-order differential equations and modeling, higher-order differential equations and modeling, series solutions of linear equations, and the Laplace transform. **Prerequisite:** Integral Calculus.

MTED3312 Elementary Linear Algebra, Credit hours: 3

Exploring basic concepts and application of linear algebra, using MATLAB in problem solving. Some topics: systems of linear equations, matrices and determinants, vectors in 2-space and 3-space, Euclidean vector spaces, general vector spaces, bases and dimension, eigenvectors and eigenvalues, and linear transformations. **Prerequisite:** Precalculus Algebra

MTED3313 Linear Programming, Credit hours: 3

Exploring strategies and methods of optimization in many areas, either economics, industry, agriculture, and many others. Some topics: solving optimization problems for making decisions, the simplex algorithm, introduction to duality, sensitivity analysis, and dual simplex algorithm. **Prerequisite:** Elementary Linear Algebra.

MTED3314 Discrete Mathematics, Credit hours: 3

Developing students' knowledge and skills in strategy and methods of proving, algorithm construction and applications, application of counting principles in real life. **Prerequisite:** Number Theory

MTED3315 Real Analysis, Credit hours: 3

Exploring some basic concepts and methods in analysis of real numbers. Some topics: basic theories of sets and function, mathematical induction and finite/infinite sets, real number properties, sequence and series, and limit. **Prerequisite:** Sequence & Series of Functions

MTED4316 History of Mathematics, Credit hours: 3

Highlighting the historical development of certain branches of mathematics in some ancient civilizations and modern era to improve the quality of mathematics teaching by giving the humane side of mathematics and making the mathematics instruction more interesting. **Prerequisites:** Geometry, Number Theory, and Integral Calculus.

Management Curriculum

BUSI1301 Basic Economic Issues, Credit hours: 3

A study on the importance of government; an introduction to macroeconomics; macro policies and trade; industrial organization and products costs; and market structures, including perfect and imperfect competition.

BUSI2303 Analytical Methods for Business, Credit hours: 3

An introduction to fundamental quantitative analysis theories, such as basic probability and descriptive statistics for application in business management, forecasting, and quality control.

BUSI3304 Research Methods for Business, Credit hours: 3

Introduces the language of research, ethical principles and challenges, and the elements of the research process within quantitative, qualitative, and mixed methods approaches. **Prerequisites:** GMAT1310 Statistics, 3 Credits (3 hrs. lec) and GBUS 1301 Introduction to Business (3 Credits).

BUSI4305 Internship, Credit hours: 3

Designed to equip students with practical experience as part of experiential learning processes in which students are directly involved in a company during certain period.

BUSI4606 Final Project, Credit hours: 6

(6 hrs. supervision.) Equips students with skills to write report on academic research, or to set up a new business venture. **Prerequisites:** BUSI3304 Research Methods for Business (3 credits).

MGMT4325 Organizational Behavior and Management, Credit hours: 3

Provides a comprehensive analysis of individual and group behavior in organizations with the purpose of understanding of how organizations can be managed more effectively and at the same time enhance the quality of employees work life.

MKTG4326 Introduction to Marketing, Credit hours: 3

Introduces students to the basic concepts of retailing, such as the structure of retailing, analysis of the retail consumer, franchising, supplier relationships, location planning and analysis, store design and visual merchandising, as well as legal and ethical issues in the retail environment.

MGMT4327 Business Communication, Credit hours: 3

Introduces students to the skills needed to communicate effectively in a team based, technologically enhanced environment, focusing on the communication strategies for success in a global business environment, while providing a smallclass structure for exchanging ideas and building skills.

MGMT3311 Introduction to Finance, Credit hours: 3

An introduction to the basic concepts and principles of finance, including financial markets and institutions, investments, and managerial finance.

MGMT3315 Microeconomic Analysis for Business Decisions, Credit hours: 3

A study of industrial structure, theory of prices under varying market conditions, and their applications to business problems.

MGMT3316 Basic Operations Management, Credit hours: 3

Concerned with the processes of creation of goods and/service, including business processes, forecasting, facility planning and layout, inventory management, quality control and just-in-time manufacturing.

MGMT4329 Using and Managing Information Systems, Credit hours: 3

Designed to equip students with the role of information systems that use information technology to collect, create, and distribute useful data for business purpose.

MGMT4330 Macroeconomic and Global Institution Policy, Credit hours: 3

A study of how the macro economy is affected by institutions, technology and other forces, and governmental policy.

MGMT3317 Integrating Bus. Fundamentals with Ethics and Law in Management, Credit hours: 3

An interdisciplinary analysis of how fundamentals of economics, finance, accounting, marketing, management, and information technology each raise ethical and legal considerations in the business environment.

MGMT3312 Introduction to Human Resources, Credit hours: 3

An introduction to the various functions of human resource management, including compensation and benefits, staffing, recruitment and selection, research, labor relations, training and development, health and safety, planning, mediation and arbitration, the influence of government legislation on industry, and human rights legislation and employment equity.

MGMT4328 Marketing Analytics, Credit hours: 3

An application of data science to marketing decision problems, such as customer data analysis techniques and their theoretical foundations to help students acquire analytic skills that can be applied to real world marketing problem.

MGMT3318 Economic Strategy for Business Decision, Credit hours: 3

Focused on the application of economic models and rationale choice to business decision making, including an overview of managerial economics, demand and supply, costs of production and the organization of the firm, market structure and pricing and output decisions, game theory and pricing, the economics of information, and the role of government in the marketplace.

MGMT4331 Innovation Principles, Credit hours: 3

An introduction to techniques for improving the flexibility and originality of students' thinking and will explore approaches used by managers and organizations to create and sustain high levels of innovation.

MGMT3313 Real Estate Finance & Investment, Credit hours: 3

An introduction to investment analysis of real estate, covering sources and costs of financing, secondary markets and government programs.

MGMT4332 Project Management, Credit hours: 3

The application of knowledge, analytical skills, scheduling software tools and techniques related to various project activities in order to meet project requirement.

MGMT3314 Intermediate Accounting for Business, Credit hours: 3

Equips students with experience taking business transactions and aggregating them into financial statements in order to optimize a firm's performance and its strategy that can be inferred from reviewing its financial statements.

Banking and Finance Concentration Courses

MGMT3323 Portfolio Theory and Analysis, Credit hours: 3

Equips students with skills to understanding of the pricing and risks of financial securities, both individually and in portfolios, with the ultimate goals of maximizing the risk-return trade-offs.

MGMT3309 Treasury Management, Credit hours: 3

Designed to give an overview of the treasury market and will facilitate a better understanding of the major facets of treasury, cash management, and financial risk management in facing global uncertainties.

MGMT3224 Credit and Lending Management, Credit hours: 2

Designed to provide students with a basic, but solid, understanding of the theoretical and practical issues associated with credit analysis and lending, including lending theory, credit risk management, analysis of various lending products, management of loan portfolios and problem loans.

Digital Marketing Concentration Courses

MGMT3306 Integrated Marketing Communications, Credit hours: 3

Designed to help students understand the principles and practices of marketing communications, involving tools used by marketers to inform consumers and to provide a managerial framework for integrated marketing communications planning.

MGMT2302 Digital Marketing, Credit hours: 3

A detailed understanding about Digital Marketing concepts, strategies and implementation, including planning a website, website promotion, email and Search Engine Optimization (SEO) campaigns, Pay Per Click (PPC) campaigns and integrating digital marketing with traditional marketing.

Entrepreneurship Concentration Courses

MGMT3308 Business Model Innovation, Credit hours: 3

A practical approach to understanding, designing, and testing business models, which includes analyzing existing business models, developing a business model for a new startup venture, and testing business model building blocks.

MGMT3321 Introduction to Startup, Credit hours: 3

This course is an introduction to the business startup development with main goal for students to understand the importance of business model, especially at the time when millennials and Gen Z prefer to start their own startup. This course is an introduction to many and dynamic activities of the startup ecosystem.

This course will allow students to gain a better understanding of what startups are all about, how a startup operates, and which business functions are needed in any startup venture.

Accounting Curriculum

ACCT2301 Intermediate Accounting I, Credit hours: 3

This course is designed to equip students with the techniques to prepare and interpret financial statements. It is part of the preparation for students to take ACCA exam. Students are expected to be able to implement the relevant accounting standards, i.e. IFRS and PSAK and into financial accounting practice. The course also emphasizes on how to analyze financial and non-financial information. Topics covered include conceptual framework, financial statements, inventory, fixed and intangible assets, receivables, and so forth. **Pre-requisite(s):** GBUS1303 Principles of Accounting II.

ACCT2302 Business Law, Credit hours: 3

The course provides a foundation for students about the legal system in Indonesia, dispute resolution, the legal impact on business. The topics cover general principles of law, contracts, sales, agency law, conflict of laws. the relationship of Indonesian law and business, the relationship between ethics and law, torts, intellectual property, and business law in the global context. **Pre-requisite(s):** GBUS1301 Introduction to Business.

ACCT2304 Intermediate Accounting II, Credit hours: 3

This course is the continuation of Intermediate Accounting. Its focus are liabilities, equity, revenue recognition, leases, accounting for income taxes, and other financial accounting standards. **Pre-requisite(s):** ACCT2301 Intermediate Accounting I.

ACCT2314 Business and Professional Ethics, Credit Hours: 3

This course will prepare students with the knowledge to deal with ethical and sustainable issues in business transactions and decision-making. Pressures from market completion, global warmings, and consumer activism as well as major business scandals have forced companies to manage companies their social capital. It is a capital that arises from the human capacity to consider others and to think and act generously and cooperatively. Companies with strong social capital will show strong integrity and moral values as well long-term views in their decision making paying attention to the welfare of their main stakeholders: customers,

employees, and the environment. Due to their massive influence as providers of a basic human needs, they need to be careful not to damage or destroy social capital. Unfortunately, this is often the case. Social issues in modern agricultural value chains include the neglect of labor standards and human rights, excessive working hours, low wages, or the unequal treatment of individuals or groups. Socially “blind” business practices can also contribute to food loss and waste, food insecurity and malnutrition, and the lack of social security. **Pre-requisite(s):** GBUS1301 Introduction to Business

ACCT2330 Fundamentals of Entrepreneurship, Credit Hours: 3

This subject introduces entrepreneurial process to students. It provides a thoughtful, practical step-by-step guide to the process of successfully launching and growing an entrepreneurship venture with a focus on opportunity recognition and feasibility analysis. Topics covered include recognizing opportunities and generating ideas, feasibility study, business plan, industry and competitor analysis, business model development, the preparation of ethical and legal foundation, assessing a venture’s financial strength and viability, building the venture team, funding, marketing, and planning for growth. **Pre-requisite(s):** GBUS1301 Introduction to Business

ACCT3210 Accounting Theory, Credit Hours: 2

The objective of this course is to equip students with a sound knowledge of theories of accounting, e.g. positive, normative, other theories. The course is started by examining the nature of theories and alternative forms of logic. The conceptual framework and key contemporary and historical accounting issues are examined, highlighting the role of theory in understanding current accounting standards, accounting practice and the use of accounting information by the myriad stakeholders in reporting entities. Throughout the course, students are introduced about current issues in accounting and how to think critically to deal with those issues. **Pre-requisite(s):** ACCT2301 Intermediate Accounting I.

ACCT3217 International Accounting, Credit hours: 2

Study theoretical and practical aspects of international accounting to gain understanding about differences in national accounting systems and reasons of such differences, analyze and evaluate worldwide processes of accounting harmonization and convergence also their influencing factors impact on national accounting systems. **Pre-requisite(s):** ACCT2304 Intermediate Accounting II.

ACCT3307 Auditing I, Credit hours: 3

This course is an introduction to auditing and other assurance services. The primary emphasis on this course is on auditor's decision-making process in both an audit of financial statements and an audit of internal control over financial reporting that covers determining the nature and amount of evidence the auditor should accumulate after considering the unique circumstances of each engagement. **Pre-requisite(s):** ACCT2301 Intermediate Accounting I

ACCT3309 Auditing II, Credit hours: 3

This course is an application of the auditing processes. The primary emphasis is on the audit procedures based on the 5 cycles: (1) audit of the sales and collection cycle; (2) the

acquisition and payment cycle; (3) the inventory and warehousing cycle; (4) payroll and payment cycle; (5) capital acquisition and repayment cycle. The appropriate audit procedures are related to internal control and audit objectives for tests of control, substantive tests of transactions and tests of detailed balances in the context of both financial the audit of financial statements and audit of internal control over financial reporting.

Each chapter demonstrates the relationship of internal controls, tests of controls and substantive tests of transactions for each category of transactions to the related balance sheet and income statement. The course will be concluded with performance of additional tests to address presentation and disclosure objectives, summarizing all audit tests, reviewing audit documentation, obtaining management representations in an integrated audit of financial statements and internal control and all other aspects of completing the audit. **Pre-requisite(s):** ACCT3307 Auditing I.

ACCT3311 Financial Statement Analysis, Credit Hours: 3

This course will prepare students with skill to understand information given by companies in their financial statements and to use it for making sound financial decisions. Financial statements provide information on company's financial position, financial performances, and company's cash flows. The course will provide tools to use this information to determine a company's financial strengths and weaknesses. **Pre-requisite(s):** ACCT2328 Corporate Finance

ACCT3314 Income Tax Individual & Corporate, Credit hours: 3

Equip students with the concept of taxation and skills to meet tax obligations as well as to prepare fiscal financial statements. Focus on the concept and practice of taxation, taxation base, Income Tax, Value Added Tax, Land and Building Tax, Stamp Duty, Customs Acquisition of Land and Building Rights, and Tax Accounting. **Pre-requisite(s):** ACG 2011 Principle of Accounting II.

ACCT3315 Individual and Corporate Tax II, Credit hours: 3

This course is the continuation of Individual and Corporate Tax I course. It covers corporate income Tax, Value Added Tax, Land and Building Tax, Stamp Duty, Customs Acquisition of Land and Building Rights, and Tax Accounting. **Pre-requisite(s):** ACCT2314 Individual and Corporate Tax I.

ACCT3316 Advanced Financial Accounting I, Credit hours: 3

This course is designed to provide students with a higher and more thorough understanding of some specific comprehensive problems in financial accounting, including Equity Method of Accounting for Investments, Preparation of Consolidated Financial Reports, and intercompany profit transactions between parents and subsidiaries. **Pre-requisite(s):** ACCT2304 Intermediate Accounting II.

ACCT3317 Advanced Financial Accounting II, Credit hours: 3

As the continuation of Advance Financial Accounting I, this course is designed to enable to have comprehensive understanding about accounting for derivative transactions, translation in foreign currencies and other specific advance accounting issues. **Pre-requisite(s):** ACCT3316 Advanced Financial Accounting I.

ACCT3318 Strategic Management Accounting, Credit Hours: 3

The module considers a range of strategic management accounting techniques and critically examines the impact of behavioral and social issues in the use and implementation of management accounting techniques. This module will help to encourage critical, analytical thinking concerning the interplay between accounting and management. **Pre-requisite(s):** GBUS2304 Managerial Accounting.

ACCT3321 Management Control System, Credit hours: 3

This course will prepare students with skill to understand how firm's managers go about designing, implementing, and using planning and control systems to implement a firm's strategies. It focuses on strategy implementation. It gives students knowledge,

insight, and analytical skills on how a corporate senior executive design and the ongoing management systems that are used to plan and control firm's performance.

It explains about management strategies, responsibility centers, transfer pricing, budgeting system, management compensation, and behavior when using these management tools. **Pre-requisite(s):** GBUS2304 Managerial Accounting.

ACCT3322 Foundations in Accounting Research, Credit Hours: 3

This course introduces students to academic research concerned with accounting. It aims to enhance students' knowledge of the research process and methodology and enable them to be aware of the problems associated with research. **Pre-requisite(s):** GMAT1310 Statistics; the student must have passed minimum 100 credits.

ACCT3325 Anti-Corruption Laws, Credit Hours: 3

This course examines the nature, causes, and moral implications of corruption, as well as strategies that can be applied to combat corruption. It uses case studies, debates, and items from the news to examine how corruption can affect effective governance not only in the public sectors but also in the business entities as well. The students will be invited to look at examples of corrupt activity where it is not always the case that corrupt activities are illegal, or even that illegal activities are corrupt. Since the focus of the course is corruption in general, rather than corruption in any specific context, examples, and cases will be drawn from a range of roles and professions, in both the public and private spheres. **Pre-requisite(s):** ACCT2302 Business Law.

ACCT3331 Introduction to Startup and Innovation, Credit Hours: 3

The course covers concepts of uncertainty and forecasting, the role of trial and error and the scientific method in entrepreneurial planning. Students engage in a deep look at alternative methodologies, including the lean startup methodology as well as business plans. It offers a set of tools that can dramatically

alter the likelihood of success, directing your effort towards activities that help build actual businesses rather than useless idle dreaming or ineffective planning approaches. The course is an interactive class, using a significant amount of experimentation in the delivery method, and a structure that applies first-hand experience in the methodologies. **Pre-requisite(s):** ACCT2330 Fundamentals of Entrepreneurship.

ACCT3332 Tools and Techniques in Project Management, Credit Hours: 3

In this course, participants will explore the processes; procedures; tools and techniques; and results to create and execute an integrated project plan. Topics will include: creating a project charter; determining the requirements; defining, creating and managing the project scope; and validating the deliverables **Pre-requisite(s):** ACCT2330 Fundamentals of Entrepreneurship.

ACCT3333 EDP Audit, Credit Hours: 3

The course equips students with knowledge that addresses the concepts, methodologies, and inner techniques information systems auditing. Students must have basic knowledge about computer, network computers, databases, internal control, and financial audits as pre-requisites of this course. Material discussion covers the development of information technology and its impact to accountant. The discussions are directed to the problem of testing the internal control of computer-based information systems, audit risk, techniques in the collection of audit evidence. Students also learn data-analytics by applying Galvanize Software. Students will receive certificates from Galvanize if they pass every exam held at the end of every module. **Pre-requisite(s):** ACCT3406 Accounting Information Systems and Internal Control.

ACCT3334 Integrated Reporting, Credit Hours: 3

Integrated thinking and integrated reporting (IR) have long gone hand-in-hand. It provides inspiring examples of how this IR process has supported the design and execution of strategies underpinning value creation for both investors and other key

stakeholders. This course will prepare students to understand key points of Multinational Companies' Integrated Reports according to the International Integrated Reporting Framework 2021 (the IIRF 2021) issued by the International Integrated Reporting Council. Students will be able to identify the content of the reports and to reconcile the differences between the report and the minimum content required by the IIRF 2021. The minimum content covers (1) Capitals: Financial, Manufactured, Intellectual, Human, Social & Relationship, and Natural; (2) Principles: Purpose, Strategy, Risks & Opportunities, Culture, Governance, and Performance. **Pre-requisite(s):** ACCT2301 Intermediate Accounting I

ACCT3335 E-Commerce Technology in Business, Credit Hours: 3

An introduction of Internet technology, its application for commerce, and its social impact. This course surveys Internet technology, collaboration and commerce activities, digital media distribution, online communities, and social networking in the Internet environment. **Pre-requisite(s):** ACCT2330 Fundamentals of Entrepreneurship.

ACCT3406 Accounting Information Systems and Internal Control, Credit Hours: 4

Accounting Information Systems (AIS), nowadays, is an integral part of modern organizations as they support managers to manage accounting and business activities. This course introduces students with business process from accounting cycles' perspective, Enterprise Resource Planning (ERP), and internal control. ERP knowledge and skills are valued by companies, with graduates having better competence and employability. Student also learn Accurate Computing Software. At the end of the semester, students will take Certified Accurate Professional exam. **Pre-requisite(s):** GBUS1305 Computer Applications; GBUS 110L Computer Application Lab.

ACCT3412 EDP Audit, Credit hours: 4

Equip students with knowledge that addresses the concepts, methodologies, and inner techniques information systems

auditing. Students must have basic knowledge about computer, network computers, databases, internal control, and financial audits as Pre-requisites of this course. Material discussion covers the development of information technology and its impact to accountant. The discussions are directed to the problem of testing the internal control of computer-based information systems, audit risk, techniques in the collection of audit evidence, and the use of audit software, for example ACL for Windows. **Prerequisite(s):** ACCT3406 Accounting Information System and Internal Control.

ACCT4221 International Taxation, Credit Hours: 2

This course provides a clear introduction to international taxation and offers in-depth discussions on several important areas of the subject in a global context. Topics of discussions will not only cover the traditional issues that arise in international tax such as double tax problem, permanent establishment and improper use of treaties, but also taxation of digitalization of the economy which has been the central issue in international tax for the last five years. **Pre-requisite(s):** ACCT3315 Individual and Corporate Tax II.

ACCT4223 Strategic Business Tax Planning, Credit Hours: 2

This course examines tax strategy and planning topics related to making important business decisions. The course addresses business formations, operations, terminations, reorganizations, acquisitions, and divisions. The course also covers tax issues related to multi-state and multi-national business transactions. **Pre-requisite(s):** ACCT3315 Individual and Corporate Tax II.

ACCT4301 Accounting Seminar & Business Simulation, Credit hours: 4

The course provides opportunities for students to understand and implement their knowledge and skills to resolve, analyze, and make a decision on the selected case studies from different firms. **Pre-requisite(s):** BUSI3308L Research Method in Accounting and ACCT3215 Accounting theory.

ACCT4314 Public Sector Accounting, Credit hours: 3

This course introduces students to key concepts, theories, research methods and research findings in public sector accounting and financial management. The emphasis will be on critically evaluating the theoretical underpinnings and assumptions of accounting and financial management in the public sector. **Pre-requisite(s):** ACCT2304 Intermediate Accounting II.

ACCT4319 Corporate Governance, Credit hours: 3

The recent financial crisis and major business scandals reminded the public the importance of corporate governance and business ethics in investor protection and well-being of the capital markets. The aim of the course is to provide an introduction of the important theories of corporate governance. The course will cover the topics on corporate board, ownership structure, CEO pay and turnover, institutional investor, regulatory re-forms and corporate social responsibility. **Pre-requisite(s):** ACCT2302 Business Law.

ACCT4324 Accounting Information Systems and Internal Control, Credit Hours: 4

The recent financial crisis and major business scandals reminded the public the importance of corporate governance and business ethics in investor protection and well-being of the capital markets. The aim of the course is to provide an introduction of the important theories of corporate governance. The course will cover the topics on corporate board, ownership structure, CEO pay and turnover, institutional investor, regulatory reforms and corporate social responsibility. **Pre-requisite(s):** ACCT2314 Business and Professional Ethics.

ACCT4336 Professional Internship, Credit Hours: 3

Students undertake a significant experiential learning opportunity whether in profit or non-profit organization. The internship is a learning strategy that allow students to apply their knowledge during the class meeting in links an applied work

setting. Through direct observation, reflection and evaluation, students are expected to gain about work environment, business process, accounting application and soft skills that may enhance their competence as future professional accountants. Students will produce a critical reflection on their internship experience demonstrating how they have addressed specific learning goals.

Pre-requisite(s): Students must have studied for 6 semesters or passed 120 credits.

ACCT4338 Scientific Writing in Accounting, Credit Hours: 3

This course is an independent learning process in research project accompanied by a supervisor. Students need to write down various information and data obtained from their research field with proper academic writing and methodology. Scientific research writing can be started from writing research proposals, research reports, proceedings and journals. Pre-requisite(s): Students must have studied for 6 semesters or passed 120 credits.

ACCT4340 Corporate Risk Management, Credit Hours: 3

The course is designed for master students and represents an upper level course. This course discusses risk management from the perspective of non-financial corporations. The course examines various types of risks (e.g. market risks, credit risks and operational risks) and risk management procedures in the context of the general framework of enterprise-wide risk management (ERM). The emphasis of the course is on theoretical approach of creating value with implementation of ERM rather than on the technical details of statistical measurement and pricing of derivatives. The course considers issues of risk measurement, risk aggregation, performance evaluation, capital allocation and strategic decision making. **Pre-requisite(s):** ACCT3406 Accounting Information Systems and Internal Control.

Mechanical Engineering Curriculum

ENGR1301 Computer Programming for Engineering Applications, Credit Hours: 3

Fundamentals of C, complexity and efficiency analysis, numerical precision and representations, introduction to data structures, structured program design, application to solving engineering problems.

MECH1101 MATLAB I, Credit hours: 1

Introduction to MATLAB programming environment, arrays, creating and running script files, 2D plotting features, functions, programming elements, polynomials, curve fitting, and interpolation.

MECH2302 Engineering Graphics, Credit hours: 3

Representations and analysis of systems of orthographic projection and graphical methods used in engineering design and production, correlated with technical sketching. Laboratory required.

ENGR2302 Statics, Credit hours: 3

A study of equilibrium of a particle, equivalent and resultant force systems, equilibrium, geometric properties of areas and solids, trusses, frames and machines, shear force and bending moments, friction.

GMAT2308 Differential Equations, Credit hours: 3

Encompasses methods for ordinary differential equations (ODE); and qualitative techniques include matrix methods approach to systems of linear equations and series solutions.

MECH2305 Thermodynamics, Credit Hours: 3

Basic laws and examples of engineering applications of macroscopic thermodynamics; equations of state; reversible and irreversible processes; vapor power cycles and gas power cycles.

MECH2306 Dynamics, Credit hours: 3

Dynamics of particles and rigid bodies as applied to mechanical systems due to kinetics, momentum, centripetal force, impulse, and moment of inertia.

MECH2308 Electrical Circuits + Laboratory, Credit Hours: 3

A fundamental in electrical with electronics focus. Focuses on current and voltage divider; circuit node voltage and mesh current analysis; Thevenin and Norton equivalents; AC circuit; electromagnetic fields; electrical power, transformer, generator, and motors; amplifiers and digital circuits; sensors and physical quantities measurements.

MECH2232 Manufacturing Processes for ME + MECH2104 Machine Shop, Credit Hours: 3

Introduction to theory of manufacturing techniques and processes with an emphasis on metalworking processes for industrial applications. Students do approaches and limitations of manufacturing in the actual machine shop. Students begin with instruction on shop safety practices as well as machinespecific safety practices. The students are then introduced to basic metal working techniques such as layout, use of hand tools, as well as set-up and operation of manual metalworking equipment including the metal lathe and milling machine. The students are introduced to the limitations of metalworking through a discussion of the material removal process.

MECH3313 Engineering Analysis, Credit Hours: 3

Advance implementations of linear algebra, matrix eigenvalue problems, Fourier series, eigenfunctions, Laplace and Fourier transforms, ordinary and partial differential equations in solving engineering problems.

MECH3312 Introduction to Fluid Mechanics, Credit Hours: 3

Fundamentals of fluid mechanics covering properties of fluids, fluid statics, dynamics of incompressible viscous and inviscid

flows, control volume formulations of continuity, momentum and energy equations, dimensional analysis, viscous pipe flow, boundary layers and drag.

MECH3309 Mechanical Behavior of Engineering Materials, Credit Hours: 3

Introduction to engineering solid materials; concepts of strain, stress, equilibrium; material/structural responses to applied loading/deflection; analysis of engineering components, e.g., beams, plates, thin-walled structures, asymmetric elements; introduction to structural stability.

MECH3310 Fundamental of Materials for Engineers, Credit Hours: 3

Principles which underlie and relate the behavior, properties, and processing of materials to their engineering applications.

MECH3111 Mechanics of Materials Laboratory, Credit Hours: 1

Practical session focuses on engineering materials for stress-strain relations, deformation, hardness, strength, fracture, and cyclic fatigue, with instruments, specimens, recording and interpretation of data, and formal engineering report writing.

ENGR3303 Environmental Ethics (General Education for Individual & Society) , Credit Hours: 3

This course is designed to help student acquire a critical understanding of the primary reasons that led to the development of environmental ethics as a field of philosophical inquiry, including the relationship between environmental ethics and traditional normative ethical theory.

MECH3317 Dynamics of Machines, Credit Hours: 3

Analysis of motions and forces in machines, design exercises.

MECH3315 Engineering Component Design, Credit Hours: 3

Application of failure analysis methods to the design of specific machine components such as shaft, gear sets, bolted/riveted/

welded joints, spring and slender/thin-walled structures.

MECH3233 Mechatronics & Laboratory, Credit Hours: 2

This course presents the field of embedded systems through a series of guided self-study modules. Students work individually or in teams of two and complete weekly mini projects aimed at providing a working knowledge of micro-controller programming, basic digital and analog circuits, and their essential components. Each of the mini projects is implemented and tested on an electronic breadboard. The course culminates with an open-ended design project integrating the skills developed through the mini modules.

MECH3318 Numerical Methods, Credit Hours: 3

Introduction to linear algebra; solution of engineering problems based upon an integrated approach combining numerical analysis and the use of computers.

MECH3316 Instrumentation Laboratory, Credit Hours: 3

Basic principles of engineering measurement and instrumentation which covers probability and statistics in measurement, basic of signal processing technique, dynamic and static behavior of measurement systems, error propagation and measurement error in feedback control system, and laboratory experiments on various instruments.

STEM4301 Internship (3 Credit Hours, on Summer term), Credit Hours: 3

A formal apprenticeship, work-based training, temporary employment, or other form of a guided professional experience that a student undertakes externally at a company / organization or under the auspices of a professional or practitioner. **Pre-requisite:** approval from Academic Advisor and study program.

STEM4302 Senior Capstone I, Credit Hours: 3

Project-based designing to solve practical, industrial problems using engineering design process.

MECH4125 Senior Colloquium, Credit Hours: 1

A transition platform between the academic experience and the world of work through lectures and seminars, resume writing workshop, to prepare the path to professional engineer, financial planning, and engineering ethics.

MECH4321 Control System Design, Credit Hours: 3

Mathematical modeling of dynamical systems, hardware and software issues; computer simulations; classical control methods including transient response, steady-state errors, bode diagrams, root locus and design of closed loop control systems; introduction to state feedback design and digital control.

MECH4319 Heat Transfer, Credit Hours: 3

Advanced and detailed study of conduction, convection, and radiation heat transfer, with applications to engineering problems.

MECH4226 Senior Mechanical Laboratory, Credit Hours: 2

Experimental investigations involving thermal power and mechanical systems such as fluid machinery, heat-exchanger, rotating equipment, and piping system.

STEM4303 Senior Capstone II, Credit Hours: 3

Extension of Senior Capstone I (MECH 4304). The projection of the planned designed into prototype, design and working system testing and iterative evaluation prior prototype finalization.

MECH4324 Mechanical Vibrations, Credit Hours: 3

Free and forced vibrations of simple mechanical systems; effects of damping; introduction to multi-degree of freedom systems.

Technical Electives

MECH4329 Planar Multibody Dynamics with Applications, Credit Hours: 3

Kinematic and dynamic analysis of mechanical systems in planar motion, numerical methods and use of computer programs in analysis.

MECH4328 Finite Element Analysis with ANSYS, Credit Hours: 3

Fundamentals of finite element analysis, model generation, solution procedure, post processing in ANSYS for problems from various disciplines such as structural thermal or fluids.

MECH 4327 Additive Manufacturing, Credit Hours: 3

General process chain and specific processes of photopolymerization, powder bed fusion. Materials properties, design and optimization for Additive Manufacturing and real engineering applications are reviewed and discussed.

MECH4320 Intermediate Thermodynamics, Credit Hours: 3

Study on power systems; non-reacting and reacting mixtures; psychometrics; gas dynamics.

MECH4322 HVAC System Design, Credit Hours: 3

Analysis and design of air conditioning systems for commercial and industrial buildings, including equipment and component selection. Energy-efficient concepts will be emphasized.

MECH4331 Numerical Methods in Fluid Mechanics and Heat Transfer, Credit Hours: 3

Development of numerical techniques for the solution of ordinary and partial differential equations that arise in heat transfer and fluid mechanics; classification of equations, methods of solutions, examples.

MECH4330 Renewable Energy, Credit Hours: 3

Introduce students with renewable energy and applications: solar energy and wind energy. Solar radiation intensity and location; basic concepts of solar thermal and photovoltaic processes; solar collectors; economic system design for electric power and water heating, active and passive building heating and cooling, industrial processes. Wind energy fundamentals.

MECH4323 Vehicle Dynamics, Credit Hours: 3

This course is designed to introduce undergraduate students to theories and principles of vehicle dynamics. Topics include behavior of tires, vehicle ride analysis, suspension system analysis, steering system design, cornering stability analysis, driving analysis, and braking analysis.

Industrial Engineering Curriculum

ENGR1301 Computer Programming for Engineering Apps, Credit Hours: 3

Fundamentals of C, complexity and efficiency analysis, numerical precision and representations, intro to data structures, structured program design, application to solve engineering problems. **Prerequisite(s):** none.

ENGR2302 Statics, Credit Hours: 3

Equilibrium of a particle, equivalent and resultant force systems, equilibrium, geometric properties of areas and solids, trusses, frames and machines, shear force and bending moments, friction. **Prerequisite(s):** GMAT 2506, GSCI 1405.

IENG2301 Introduction to Systems & Industrial Engineering, Credit Hours: 3

System modeling (basic constructs and principles of system models include discrete-time, discrete-state system theory), finite state machines, modeling components, system coupling, modes, homomorphisms, and system experiments (simulation). System design including requirements, lifecycle, performance

measures, and cost measures, tradeoffs, alternative design concepts, testing plan, and documentation. Applications and case studies from engineering. **Prerequisite(s):** GENG 1301, GMAT 2506.

IENG2302 Object-Oriented Modeling & Design, Credit Hours: 3

Modeling and design of complex systems using all views of the Unified Modeling Language (UML). Most efforts are in the problem domain (defining the problem). Some efforts are in the solution domain (producing hardware or software). **Prerequisite(s):** ENGR 1301.

IENG2304 Engineering Economy, Credit Hours: 3

Fundamentals of economic analysis and the time value of money for engineers. Construction of financial models in EXCEL including Income, Cash Flow, and Balance Sheet. Estimation of required capital and project acceptance criteria. **Prerequisite(s):** GENG 1301.

IENG2103 Industrial Engineering Colloquium, Credit Hours: 1

A colloquium designed to help students understand what industrial engineers do. Students will interact with speakers and take tours to local companies. The course helps students select course options within the SIE programs and helps focus on possible industrial engineering application areas. **Prerequisite(s):** none.

IENG2305 Mathematical Foundations of Industrial Engineering, Credit Hours: 3

Basics of data structures, transformations, computer methods, their implementation in MATLAB, and their applications in solving engineering problems. **Prerequisite(s):** GMAT 2506, GSCI1405, ENGR 1301.

IENG3306 Introduction to Engineering Probability & Statistics, Credit Hours: 3

Axioms of probability, discrete and continuous distributions,

sampling distributions. Engineering applications of statistical estimation, hypothesis testing, confidence intervals. **Prerequisite(s):** GMAT 2506.

IENG3307 Deterministic Operations Research, Credit Hours: 3

Linear programming models, solution techniques, sensitivity analysis, and duality. The objective is the development of working knowledge of deterministic operations research techniques, primarily linear programming; logistics network, and flow problems: transportation problems, shortest path, and vehicle routing problems, maximum flow problems; project and resource management, operations sequencing and resource scheduling. **Prerequisite(s):** IENG 2304, IENG 2305.

IENG3308 Software for Engineers, Credit Hours: 3

Programming in C. Modular program design and verification, pointers and structures, data structures, and algorithms including lists, trees, graphs, searching, and sorting. **Prerequisite(s):** ENGR 1301.

IENG3309 + IENG 3109L, Manufacturing Process + Lab, Credit Hours: 4

Introduction to the theory of manufacturing techniques and processes with an emphasis on metalworking processes for industrial applications. Students do approaches and limitations of manufacturing in the actual machine shop. Students begin with instruction on shop safety practices, which includes OSHA standards/industrial safety, as well as machine-specific safety practices. The students are then introduced to basic metalworking techniques such as layout, use of hand tools, as well as set-up and operation of manual metalworking equipment including the metal lathe and milling machine. The students are introduced to the limitations of metalworking through a discussion of the material removal process. **Prerequisite(s):** ENGR 1301.

IENG3310 Technical Writing, Credit Hours: 3

Analysis and presentation of scientific and technical information. **Prerequisite(s):** GCOM 1305.

IENG3311 Probabilistic Models in Operations Research, Credit Hours: 3

Probability, Markov chains, Poisson processes, queuing models, reliability models. **Prerequisite(s):** IENG 3306.

IENG3312 Integrated Manufacturing Systems, Credit Hours: 3

Introduction to the integrated manufacturing enterprise and automation. Topics include computer-aided design, process planning, computer numerical control machining, machine vision, application of robots, and automation. **Prerequisite(s):** GMAT 2506, GSCI 1405, ENGR 1301.

IENG3313 Production Systems Analysis, Credit Hours: 3

Production systems, quantitative methods for forecasting, aggregate planning, inventory control, materials requirement planning, production scheduling, manpower planning, and facility design. **Prerequisite(s):** IENG 3306, IENG 3307.

IENG3314 Engineering Experimental Design, Credit Hours: 3

Design and analysis of observational and factorial experiments employing numerical and graphical methods. Topics include hypothesis testing for simple comparative tests (Z-test, t-test, F-test), basic principles of experimental design, factorial design (full factorial, fractional factorial), analysis of variance (ANOVA), etc. **Prerequisite(s):** IENG 3306.

IENG3315 Quality Control & Six Sigma, Credit Hours: 3

Quality, improvement, and control methods with applications in design, development, manufacturing, delivery, and service. Topics include modern quality management philosophies, engineering/statistical methods (including process control, control charts, process capability studies, loss functions, and experimentation for improvement) and TQM topics (customer-driven quality, teaming, Malcolm Baldrige, and ISO 9000). **Prerequisite(s):** IENG 3306.

STEM4301 Internship, Credit Hours: 3

A formal apprenticeship, work-based training, temporary employment, or other form of a guided professional experience that a student undertakes externally at a company / organization or under the auspices of a professional or practitioner. **Pre-requisite:** approval from Academic Advisor and study program.

IENG4316 Simulation Modeling and Analysis, Credit Hours: 3

Discrete event simulation, model development, statistical design, and analysis of simulation experiments, variance reduction, random variate generation, Monte Carlo simulation. **Prerequisite(s):** IENG 3306.

IENG4317 Human Factors & Ergonomics in Design, Credit Hours: 3

Application of psychological and physiological principles to design of systems, organizations, facilities, and products to enable human-centered design. Students will learn multidisciplinary fields such as psychology, sociology, biomechanics, physiology, anthropometry, industrial design, human-computer interaction, etc. **Prerequisite(s):** IENG 3306.

IENG4421 Embedded Computer Systems, Credit Hours: 4

Boolean algebra, combinational and sequential logic circuits, finite state machines, simple computer architecture, assembly language programming, and real-time computer control. The computer is used as an example of systems engineering design; it is analyzed as a system, not as a collection of components. **Prerequisite(s):** GENG 1301.

STEM4302 Senior Capstone I, Credit Hours: 3

A culminating experience for majors involving a substantive project that demonstrates a synthesis of learning accumulated in the major, including broadly comprehensive knowledge of the discipline and its methodologies. IENG 4302 and IENG 4303 must be taken in consecutive semesters. **Prerequisite(s):** Senior Standing.

IENG4303 Senior Capstone II, Credit Hours: 3

A culminating experience for majors involving a substantive project that demonstrates a synthesis of learning accumulated in the major, including broadly comprehensive knowledge of the discipline and its methodologies. IENG 4305 and IENG 4306 must be taken in consecutive semesters. **Prerequisite(s):** IENG 4302.

Technical Electives

IENG4318 Project Management, Credit Hours: 3

Foundations, principles, methods, and tools for effective design and management of projects in technology-based organizations. This course focuses on the scope, time, cost, performance, and quality concerns of engineering projects characterized by risk and uncertainty. Initiating, planning, executing, monitoring, controlling, and closing process are addressed. Students design and complete a project from concept through completion. Project Management software is utilized. **Prerequisite(s):** Advanced Standing.

IENG4320 Supply Chain Management, Credit Hours: 3

Fundamentals of Supply Chain Management including inventory/logistics planning and management, warehouse operations, procurement, sourcing, contracts, and collaboration. **Prerequisite(s):** IENG 3306, IENG 3307.

IENG4322 Technical Sales and Marketing, Credit Hours: 3

This course aims to develop an understanding of the Technical Sales and Marketing process. Students are taught how to improve technical and technical marketing communication skills, understand the importance of integration with other business functions for success, understand the importance of relationship selling, understand the different phases of the technical sales process, and understand what a career as a technical sales professional entails. **Prerequisite(s):** Advanced Standing.

IENG4323 Engineering Decision Making Under Uncertainty, Credit Hours: 3

Application of principles of probability and statistics to the design and control of engineering systems in a random or uncertain environment. Emphasis is placed on Bayesian decision analysis. **Prerequisite(s):** Advanced Standing.

IENG4324 Engineering Statistics, Credit Hours: 3

Statistical methodology of estimation, testing hypotheses, goodness-of-fit, nonparametric methods, and decision theory as it relates to engineering practice. Significant emphasis on the underlying statistical modeling and assumptions. **Prerequisite(s):** Advanced Standing.

IENG4325 Reliability Engineering, Credit Hours: 3

This is a three-credit course configured for well-qualified seniors, graduate students, and engineering professionals and practitioners. It is concerned with determining the probability that a component or system, whether simple or complex, will function as intended. The scope of this course includes (1) Root cause analysis of critical failures, (2) reliability models of components and systems, (3) development of statistical methods for estimating the reliability of a product, (4) use of software tools to perform model development and analysis, and (5) methodologies to influence system designs. **Pre-requisite:** Advanced Standing.

IENG4326 Survey of Optimization Methods, Credit Hours: 3

Survey of methods including network flows, integer programming, nonlinear programming, and dynamic programming. Model development and solution algorithms are covered. **Prerequisite(s):** Advanced Standing.

IENG4327 The Systems Engineering Process, Credit Hours: 3

Process and tools for systems engineering of large-scale, complex systems: requirements, performance measures, concept exploration, multi-criteria tradeoff studies, life cycle models,

system modeling, etc. **Prerequisite(s):** Advanced Standing.

IENTG4328 Cost Estimation, Credit Hours: 3

Focuses on principles of cost estimation and measurement systems with specific emphasis on parametric models. Approaches from the fields of hardware, software, and systems engineering are applied to a variety of contexts (risk assessment, judgment & decision making, performance measurement, process improvement, adoption of new tools in organizations, etc.). Material is divided into five major sections: cost estimation fundamentals, parametric model development and calibration, advanced engineering economic principles, measurement systems, and policy issues. **Prerequisite(s):** Advanced Standing.

IENTG4329 Engineering Entrepreneurship, Credit Hours: 3

Principles of the engineering sales process in technology-oriented enterprises; selling strategy, needs analysis, proposals, technical communications, electronic media, time management, and ethics; practical application of concepts through the study of real-world examples. **Prerequisite(s):** Advanced Standing.

Computer Science / Informatics Curriculum

COMP1401 Computer Programming, Credit Hours: 4

Covers the fundamentals of procedural / structured programming languages via practical exposure to the C/C++ programming language. **Pre-requisite:** -

COMP1402 Object-Oriented Programming, Credit Hours: 4

Covers the fundamentals of object-oriented programming languages via practical exposure to the Java programming language. **Pre-requisite:** COMP1401.

MTED3314 Discrete Mathematics, Credit Hours: 3

An introductory in discrete mathematics, the study of mathematical structures (objects) which are discrete. Covers the strategy and methods in proof, construct algorithm and apply various methods of counting principles in real life. **Pre-requisite:** -

COMP2303 Digital Systems, Credit Hours: 3

Designed to introduce students to applied logics, which in turn, introduces them to the basics of the electronics of digital systems. Possible topics include Number Systems, Logic Gates, Boolean algebra, Arithmetic Operations, Logic Families, Counters, and an Introduction to Microcontrollers/Microprocessors. **Pre/co-requisite:** MTED3314.

COMP2304 Fundamentals of Computer Organization & Architecture, Credit Hours: 3

Covers the overview of number systems and representation in computer systems, computer arithmetic, the CPU, registers, bus architectures, instruction types, micro operations, memory hierarchy, virtual memory, I/O devices, and control unit. **Pre/co-requisite:** COMP2303.

COMP2405 Data Structures, Credit Hours: 4

Covers a variety of data structures and their algorithmic. Possible topics include arrays, lists, trees, hashing, sorting, and heaps. There will also be a cursory introduction to the fields of complexity theory, analysis, and the notion of NP-completeness. **Pre-requisite:** COMP1401 - Computer Programming. **Co-requisite:** COMP1402.

COMP2306 Operating Systems, Credit Hours: 3

Designed to introduce students to a wider range of Operating Systems (OS) and their implementation details. Possible topics include OS Architecture, process and threads, resource management, file systems, I/O, and security. **Pre/co-requisite:** COMP2304.

COMP3307 Design and Analysis of Algorithm, Credit Hours: 3

A study on how to effectively design algorithms using a number of design paradigms, including divide and conquer, dynamic programming, branch and bound, recursion, brute force, and greedy algorithms. Other topics include P vs. NP, Computability,

Turing Machines, and Complexity Theory. **Pre-requisite:** COMP2405.

COMP3408 Database Management System, Credit Hours: 4

A study of database management systems (DBMS), relational databases and object-oriented databases. Possible topics include relational algebra, SQL, store procedures, user-defined functions, cursors, an embedded SQL program, clientserver interfaces, entity relationship diagrams, normalization, concurrency, transactions, database security, constraints, and object-relational databases. **Pre-requisite:** COMP2405.

COMP3309 Computer Networks, Credit Hours: 3

Designed to equip students with fundamental concepts in the design and implementation of computer communication and networking in wired and wireless settings. Possible topics include applications of networks, network structure and architecture, network topology design, network switching methods, medium access sub layer, error handling, network layer, routing, transport layer, connection management, session layer, application layer. **Pre-requisite:** -

COMP3310 Information Theory, Credit Hours: 3

An introduction to the basics of information theory. Possible topics include entropy, mutual information, data compression, Huffman coding, universal source coding, channel coding, error-correcting. **Pre-requisite:** GMAT1505, GMAT1310.

COMP3311 Software Engineering, Credit Hours: 3

A comprehensive analysis of software engineering techniques and its applications. Possible topics include Introduction to Software Engineering; Software Process Models; Project Management and Requirement Engineering; System Modelling and Prototyping; Design Engineering; Verification and validation. **Pre-requisite:** COMP1402.

COMP3312 Human Computer Interaction, Credit Hours: 3

The fundamentals of human computer interaction, user interface design, and usability analysis. Covers fundamental theory and practice of the design, implementation, and evaluation of human computer interfaces. **Pre-requisite:** COMP1401.

COMP3313 Web Programming, Credit Hours: 3

Designed to equip students with abilities to design and develop dynamic websites using PHP and MySQL. Students will learn how to build dynamic web pages and active contents by integrating the HTML with server-side scripting language such as PHP and MySQL for the database. **Pre-requisite:** COMP1402; **Co-requisite:** COMP3408.

COMP3314 Fundamentals of Information Security, Credit Hours: 3

Designed to equip students with principle concepts in the field of information and computer security. Possible topics include classification of attacks, damage assessment, information classification; threats and malicious code; cyber law and standards, application / software related security - malware, antivirus; Internet security - packet filtering, firewalls, and virtual private networks. **Co-requisite:** COMP3309.

COMP3315 Artificial Intelligence, Credit Hours: 3

Covers the history, theory, and computational methods of Artificial Intelligence (AI). Possible topics include search, representation of knowledge and computational methods for reasoning, intelligent agents; logical agents: propositional logic, first-order logic, logical inference; uncertainty; and learning. **Pre-requisite:** COMP1401, MTED3314, GMAT1310.

COMP3316 Automata Theory, Credit Hours: 3

An introduction to the theoretical foundations of computer science. Covers different models of computation and their limitations. Possible topics include formal grammars, finite-

state automata, push-down automata, and Turing machines. **Pre-requisite:** MTED3314.

STEM3304 Research Methods, Credit Hours: 3

An introduction to research processes, including formulation of research problem, research design, sampling and measurement methods, research proposal writing, literature review, data collection, data processing, data analysis and reporting. **Pre-requisite:** GMAT1310.

COMP3317 Seminar, Credit Hours: 3

An exposure to a variety of computing and computer science topics as presented by the instructor and several (guest) lecturers. Students will also have the opportunity to present their own preliminary research on several subjects of interest. **Pre/co-requisite:** STEM3304.

STEM4301 Internship, Credit Hours: 3

A formal apprenticeship, work-based training, temporary employment, or other form of a guided professional experience that a student undertakes externally at a company / organization or under the auspices of a professional or practitioner. **Pre-requisite:** approval from Academic Advisor and study program.

MECH3318 Numerical Methods, Credit Hours: 3

Programming principles and techniques for matrix and array operations, equation solving, and numeric simulations applied to computational problems and visualization of information; platforms include spreadsheets, symbolic algebra packages, and mathematical analysis software. **Pre-requisite:** GMAT2506, GMAT2309.

COMP4318 Final Year / Capstone Project 1, Credit Hours: 3

An independent research on a question or problem in the field of computer science, in which students engage with the scholarly debates in the relevant disciplines, and - with the guidance of a faculty advisor - produce a substantial proposal that reflects

a deep understanding of the topic. **Pre-requisite:** approval from Advisor and study program.

COMP4319 Final Year / Capstone Project 2, Credit Hours: 3

Continuation of COMP4305, in which students carry out their proposal, perform a substantial work that reflects a deep understanding of the topic, and, with the guidance of a faculty advisor, produce a comprehensive report. **Pre-requisite:** approval from Advisor and study program.

Technical Electives

COMP4320 Computer System Administrator, Credit Hours: 3

An exposure to roles of a computer system administrator, UNIX commands, controlling processes, common file system directories, user maintenance, special devices, drivers and the kernel, TCP/IP networking, and routing concepts. **Pre-requisite:** COMP2306, COMP3309, COMP3314.

COMP4321 Machine Learning, Credit Hours: 3

Designed to equip students with the fundamentals of paradigms and techniques in machine learning. Covers introduction to machine learning, including supervised and unsupervised learning algorithms, reinforcement learning and an introduction to deep learning architectures. **Pre-requisite:** COMP1401, GMAT1310, COMP3316.

COMP4322 Mobile Apps Development, Credit Hours: 3

Designed to equip students with knowledge and skills to develop applications (apps) for mobile devices, particularly Android devices. **Pre-requisite:** COMP1402.

Information Systems Curriculum

INFS2301 Principles of Information Systems, Credit Hours: 3

This course is designed to provide students with a foundational understanding of Information Systems (IS). Topics will include Information Systems fundamentals; IS infrastructure; organizational and business strategies for Information Systems; Managing Information Systems; Information Systems for commerce and collaboration; business intelligence and Enterprise Information Systems; security, privacy, and ethics for Information Systems.

INFS2302 Enterprise Architecture, Credit Hours: 3

This course will explain the architecture, concepts, and methods that exist in the design and implementation of IT in enterprise-scale companies, along with the implementation of their programming. This course will help provide a special understanding of the role of service-oriented architectures (SOA) and its development in needs analysis, design, and application at the entrepreneurial scale. In addition, this course also discusses architecture/technology that can be directly applied in different platforms, supporting component-based technology, service-based and distributed systems (using Webservice in Java and .NET).

INFS2330 Economics of Information Systems

This course introduces students to the methods and modern techniques of economic analysis for financial decision-making. Development of income, cash flow, and balance sheet statements are also covered. Topics include time value of money, valuation techniques, systems replacement analysis, and information systems project acceptance criteria.

INFS3307 e-Commerce, Credit Hours: 3

This course discusses the concepts and scope of e-Commerce (virtual business), e-Commerce transaction systems, requirements for building e-Commerce websites, security

requirements in e-Commerce, how to shop online, selling products through e-Commerce, as well as tips and tricks in doing e-Commerce.

INSF4337 Data Analysis & Visualization Credit Hours: 3

This undergraduate upper-level course (elective) will cover the important concepts and techniques relating to data analytics, including: statistical foundation, data mining methods, data visualization, and web mining techniques that are applicable to emerging e-commerce, government, health and security applications. The course contains lectures, readings, lab sessions, and hands-on projects. Most business school seniors are welcome. The course will require some basic computing and database background. The course will prepare students to become a data scientist or a data-savvy manager for different businesses.

INFS3304 Information Systems Audit, Credit Hours: 3

In this course, the security information process is examined, including the technology that processes, stores, and sends information, the stakeholders who manage information, and the business processes that use the related information.

INFS4305 System Integration, Credit Hours: 3

This course discusses the design of a system from several aspects: evaluating the design from several facets, comparing several design results, determining the best design, and integrating the chosen design in the form of a uniform technology architecture.

INFS3331 Management Information Systems, Credit Hours: 3

This course will cover the concepts of organization, information technology devices, systems concepts, systems methods, and information security systems.

INFS3333 Introductory Methods of Network Analysis

This course provides students with a methodology for analyzing networks by examining the network at its infrastructure, network and applications layers; exploring how they transfer

data; investigating how network protocols work to enable communication; and probing and analyzing how the lower-level network layers support the upper ones. Students will use hands-on labs and exercises to investigate and analyze network fundamentals.

INFS4338 Cloud Computing

This course provides students with an introduction to the concepts of cloud computing and a clear understanding of the variety, complexity, and capabilities of modern cloud platforms. The student will learn how to deploy web services in a cloud computing environment and how to scale capabilities using orchestration and automation technologies. The student will also be exposed to some of the fundamental security issues and challenges of a cloud computing environment and best practice approaches to mitigate those issues.

INFS2329 Fundamentals of Database Management Systems

This course introduces database management systems, relational databases, and object-oriented databases. The topics cover relational algebra, SQL, stored procedures, user-defined functions, cursors, an embedded SQL Program, client-server interfaces, entity relationship diagram, normalization, concurrency, transactions, database security, constraints, and object-relational databases.

STEM4301 Internship for Information Systems, Credit Hours: 3

A formal apprenticeship, work-based training, temporary employment, or other form of a guided professional experience that a student undertakes externally at a company / organization or under the auspices of a professional or practitioner. **Pre-requisite:** approval from Academic Advisor and study program.

STEM4302 Capstone I, Credit Hours: 3

(Independent study). An independent research on a question or problem in the field of information systems, in which students engage with the scholarly debates in the relevant disciplines, and - with the guidance of a faculty advisor - produce a substantial

proposal that reflects a deep understanding of the topic. **Pre-requisite:** approval from Advisor and study program.

INFS2318 Technopreneurship, Credit Hours: 3

This course will introduce student to the process of motivation and innovation of entrepreneurship and technopreneurship. This course will give an understanding of the principles of entrepreneurship including developing business plans; marketing in the global information age; financing and marketing; innovation and creativity; financial management; and product identification.

INFS4342 Senior Capstone, Credit Hours: 3

(Independent study). Continuation of INFS4314, in which students carry out their proposal, perform a substantial work that reflects a deep understanding of the topic, and - with the guidance of a faculty advisor - produce a comprehensive report. **Pre-requisite:** approval from Advisor and study program.

Visual Communication Design (New Media) Curriculum

VCDD1402 Narrative Concepts and Storytelling, Credit Hours: 4

Students will be introduced to the concepts and outcomes of different narrative forms, both from a historical and theoretical scope. This course focuses on understanding the wider cultural contexts that inform narratives. Students will develop a personal storytelling structure that can be interacted with by others through a range of different assignments. **Pre-requisite:** -

VCDD1301 The Origin of Design, Credit Hours: 3

This course will encourage student to work independently and in groups to establish an understanding of Design Fundamentals including design's method and process. Comparing design practice in the past and present, interpreting as to reflect design is a way of thinking. **Pre-requisite:** -

GHUM1306 Fundamental of Drawing, Credit Hours: 3

This is an introductory drawing course that is intended to help develop basic observational and perceptual drawing skills. The course teaches students a variety of concepts and approaches in drawing so that the student is able to demonstrate a range of abilities and versatility with technique. Such conceptual variety can be demonstrated through either the use of one or the use of several media. **Pre-requisite:** -

VCDD1325 Photography & Videography, Credit Hours: 3

This course introduces student to the core concepts of digital photographic techniques, how-to-use photography software, develop an efficient workflow and archives management. This course explores the aesthetics aspects, basic scientific foundations, and expand the student's knowledge of photography and videography as art forms and as important mediums in commercial utilizations, journalism and news, science, and new media industry. **Co-requisite:** VCDD1402, VCDD 1301.

VCDD1326 Design Thinking & Theory, Credit Hours: 3

This course will give an understanding of the principles of innovation and the process of how to deliver innovation through Design Thinking. Students will practice the five phases of Design Thinking to tackle simple problems that produce solution that leads to innovation. **Pre-requisite:** -

VCDD1427 Computer Graphics Design, Credit Hours: 4

Providing an understanding of Computer Graphics Design, a basic course that introduces the software commonly used in practice: Adobe Photoshop & Adobe Illustrator. **Co-requisite:** GHUM1306, VCDD1402, VCDD1301.

VCDD1328 Typography Fundamental, Credit Hours: 3

This course Introduces student to the core elements of typography and understand the poetic potential of type, its spatial and layout-based relationship from the printed page to moving image. Students are introduced to biographies and

works of important typographers. The students will develop a personal experience of type, establishes a digital learning journal to identify research and outcomes clearly. **Pre-requisite:** VCDD1402, VCDD1301.

VCDD1229 Color & Material, Credit Hours: 2

Identifying, analyzing, exploring, perceiving, philosophizing colors, harmony colors, opaque colors, translucent colors (transparent colors), RGB/CMYK colors, light colors, and color sharing (Primary, Secondary, Tertiary). **Pre-requisite:** VCDD1402, VCDD1301.

VCDD2330 Fundamental of Audio Video Production, Credit Hours: 3

Provides a basic understanding of producing video for a variety of uses. Topics include analyzing the pre-production, production, and post-production process, as well as explore the equipment and techniques used to develop a quality video production. **Pre-requisite:** VCDD1427, VCDD1325.

VCDD2431 3D for Design, Credit Hours: 3

This course provides the process of taking a shape and molding it into a completed 3D model and animation. The most typical means of creating a 3D model is to take a simple object, called a primitive, and extend or "grow" it into a shape that can be refined and detailed then animate it. **Pre-requisite:** GHUM1306, VCDD1427.

VCDD2332 Visual Communication & Advertising, Credit Hours: 3

The course will give the knowledge working in an advertising agency. While seeking creative concepts that will best convey the advertising message, this course will look into different subjects which have to do with the professional skills of the Art Designer in an advertising agency e.g. focusing of the advertising promise, optimal photography for conveying the message, typography, layout, use of media and more. **Pre-requisite:** VCDD1301, VCDD1402, VCDD1326.

VCDD4427 Web Design, Credit Hours: 4

This course will provide knowledge on the different areas of web development include web design; interface design; authoring, including standardized code and proprietary software; user experience design; and search engine optimization. **Pre-requisite:** - (recommended for 2nd year students).

VCDD2433 Animation & Motion Graphics, Credit Hours: 4

In this introductory course, students learn to put static (non-moving) images into motion. these courses teach students to use various industry-standard Adobe software programs. Skills developed include manipulation of images, simulation of camera angles and movement, motion contrasting and digital video, this course also involve sound editing and image manipulation. **Pre-requisite:** VCDD1427, VCDD2431.

VCDD2434 VFX & Compositing, Credit Hours: 4

This course will explore the latest technological advances in compositing and visual effects that use in broadcast industries and understanding how 2D and 3D animation integrate with video. **Pre-requisite:** VCDD2230.

VCDD2335 Media History, Credit Hours: 3

This course focuses on the history of the world mass media - to people, institutions and ideas that describe the past also will influence the future. In this subject there will be treated different topics related to the history of media, including technological changes, social roles, and changes of business structures of the mass media. **Pre-requisite:** - (recommended for 2nd year students).

VCDD3436 Creative Coding, Credit Hours: 4

Students will be introduced to the concepts and outcomes of different forms of programming languages through a theoretical and practical scope of contents and activities. Following a wider cultural context and developing a personal storytelling structure, students will join creative practice with aesthetics in order to

affect a more comprehensive understanding of new digital possibilities and thought in the field of Interactive Digital Media. **Pre-requisite:** - (recommended for 3rd year students).

VCDD3437 UI/UX Design, Credit Hours: 4

The UI/UX Design course will teach student a design-centric approach to user interface and user experience design, and offers practical, skill-based instruction centered around a visual communications perspective, rather than on one focused on marketing or programming alone. **Pre-requisite:** VCDD4327.

VCDD3438 IoT (Internet of Things) in New Media, Credit Hours: 4

This course is designed to teach students about IOT as new media in design environment. Students will learn about IOT concept and shifting that happen in the design environment. The use of social media and multimedia will be catered in this course. **Pre-requisite:** VCDD2335.

VCDD3439 Design Research Methodology, Credit Hours: 4

Introduction to research processes, including formulation of research problem, research design, sampling and measurement methods, research proposal writing, literature review, data collection, data processing and reporting. **Pre-requisite:** - (recommended for 3rd year students).

VCDD3345 – Indonesia Art History, Credit Hours: 3

The Indonesian Art History course emphasizes on a deep conceptual understanding of Indonesian art historical concepts. Students will develop the essential skills of visual and contextual analysis. By examining works of art from Indonesia's Diverse culture and the relationships among these works, students develop an understanding of Indonesian artistic traditions. Students analyse works of art in their contexts, considering issues of patronage, gender, politics, religion, and ethnicity. **Pre-requisite:** - (recommended for 3rd year students).

VCDD3340 Experimental Art & Design, Credit Hours: 3

In this course the student will work independently and design a project brief that meets with their-own aspirations and passions for personal exploration from selecting a theme, problem analysis, design process, issue, or concern, etc. Students are required to consider narrative concepts and storytelling as a main pillar to the nature of their design project. The student can explore any visual outcomes to convey the creative ideas. This course also supports the enhancement of independent learning by exploring how to propose, plan, and manage self-initiated project. **Pre-requisite:** VCDD3438; **Co-requisite:** VCDD3441, VCDD3443.

VCDD3441 Game Design, Credit Hours: 4

A practical introduction to game design and game design concepts, emphasizing the basic tools of game design: paper and digital prototyping, design iteration, and user testing. **Pre-requisite:** VCDD3436, VCDD3437, VCDD3438, VCDD3439; **Co-requisite:** VCDD3443.

VCDD3442 Design Entrepreneurship, Credit Hours: 4

This course will introduce student to the processes of motivation and innovation and of Entrepreneurship. This course will give an understanding of the principles of entrepreneurship including developing business plan; marketing in the global information age; financing and marketing; innovation and creativity, financial, management; and product identification. **Pre-requisite:** VCDD3436, VCDD3437, VCDD3438, VCDD3439.

VCDD3443 Augmented & Virtual Reality, Credit Hours: 4

In this course you will learn how to build AR and VR apps with Unity and look at the different ways to produce interactive digital media presentation. **Pre-requisite:** VCDD3436, VCDD3437, VCDD3438, VCDD3439; **Co-requisite:** VCDD3441, VCDD3443; **Co-requisite:** VCDD3441.

STEM4301 Internship, Credit Hours: 3

A formal apprenticeship, work-based training, temporary employment, or other form of a guided professional experience that a student undertakes externally at a company / organization or under the auspices of a professional or practitioner. **Pre-requisite:** approval from Academic Advisor and study program. **Pre-requisite:** completion of a minimum 100 credit hours.

VCDD4422 Collaborative Design, Credit Hours: 4

In this course the student will work Collaboratively with real-life project and design a solution that meets with the client's objective. The student can explore any visual outcomes to convey the creative ideas. This course also supports the enhancement of team-work learning environment by exploring how to propose, plan, solving the problems, and manage the team. **Pre-requisite:** VCDD3440, VCDD3441, VCDD3442, VCDD3443.

VCDD4423 Final Project I, Credit Hours: 4

Development of Final Design Project. **Pre-requisite:** VCDD3440, VCDD3441, VCDD3442, VCDD3443.

VCDD4344 Motion Capture, Credit Hours: 3

Intro to motion capture course. Provides the basics principles of Motion Capture & Performance Capture from T-Pose to ROMs and Realtime capture - this course is essential for those new to the world of 'Mocap'. **Pre-requisite:** - (recommended for 4th year students).

VCDD4421 Professional Practice Portfolio, Credit Hours: 4

This course will prepare the students to enter professional life. The students will develop a portfolio that has a strong emphasis on relationship between the creative process of digital design and responsibility to the clients and society in relation to achieve effective interaction strategies and communication objectives. This course will give opportunity to the students develop and practice their critical evaluation skills by evaluating their peer

portfolio's quality and comparing these evaluations with the professional assessment given by the Lectures. **Pre-requisite:** VCDD4322, VCDD4423.

VCDD4424 Final Project II, Credit Hours: 4

Final year Project II: Thesis Writing. **Pre-requisite:** VCDD4322, VCDD4423.

Psychology Curriculum

PSYC3323 Cognitive Neuroscience, Credit Hours: 3

This course is, in essence, a user guide to your brain. How do you store a lifetime of memories, make difficult decisions, and understand and generate language? What factors drive how you perceive the world and engage in a wide range of motor actions from taking a single step to dancing? What enables you to feel emotions and understand what others are thinking? The main objective of this course is for you to advance your knowledge of how the brain supports these cognitive abilities and others. Major topics will include sensation and perception, motor control, attention, learning and memory, language, executive functions, and social cognition. To cover these topics, you will be exposed to multiple methods for studying the brain, including a variety of modern brain imaging techniques as well as examination of individuals with brain lesions.

Cognitive neuroscience is one of the most fascinating and active fields of research today. By the end of this course, we hope that you will have a better understanding of this rapidly advancing field, what we presently know, and what big questions are still under scientific investigation. **Pre-requisite:** -

PSYC3315 Clinical Psychology, Credit Hours: 3

Clinical Psychology teaches comprehensive mental and behavioral health care for individuals, couples, families, and groups, and how human beings can maintain themselves without any mental health issues. Clinical psychology also concerns with the assessment and treatment of mental illness and abnormal behavior.

PSYC4327 Health Psychology, Credit Hours: 3

The main aim of Health Psychology is to introduce students to the broad theories, terminology, and substantive research findings of the field through consideration of the psychological influences on illness and wellness, as well as the effects of physical health on psychosocial functioning. Throughout the term, we will examine how these processes operate across varied levels of analysis, including, for example, consideration of the different biological systems of the body, how people make health behavior changes, the effects of interpersonal contexts on physical health, the development, maintenance, and psychosocial correlates of specific diseases, cultural variation in disease and health behaviors, and the role of larger systems in promoting wellness and the management of chronic illness. **Pre-requisite:** -

PSYC3320 Social Psychology, Credit Hours: 3

This course as an introduction to the major theories and research findings of social psychology. Specific topics covered in the class include self, social cognition, attitudes, interpersonal relations, group processes, prejudice, and aggression.

PSYC3318 Psychodiagnostics III (Personality Assessment), Credit Hours: 3

This course is the third level of psychodiagnostics, which offers an overview of personality assessment. It provides history, development, goal, and the use of personality assessment in broad settings. This course will particularly familiarize students with theoretical knowledge as well as practical details of personality assessment.

PSYC4329 Abnormal Psychology, Credit Hours: 3

Abnormal psychology is a branch of psychology that empirically studies abnormalities in cognition, emotion, and behavior. This course is intended to provide a broad overview of mental illness, with a special emphasis on the classification of mental illness by the Diagnostic and Statistical Manual 5 (DSM-5). The course will also cover theoretical approaches to treating mental health

problems and specific treatments that work and do not work for different diagnoses. In addition to learning about diagnosis and treatment, students will be introduced to the biopsychosocial model and the causal theories behind.

PSYC3317 Educational Psychology, Credit Hours: 3

Educational psychology is designed to give the student a thorough understanding of the theories and principles of psychology as applied to teaching and learning. The students will demonstrate knowledge, understanding, and application of theories and principles of development, learning, memory, motivation, individual differences, instruction, classroom management, and measurement and evaluation.

PSYC3324 Forensic Psychology, Credit Hours: 3

Forensic psychology learns the application of psychological knowledge to help answer legal question, raising in criminal, civil, contractual, or other judicial proceedings.

PSYC3307 Psychological Measurement and Statistics, Credit Hours: 3

Does sleep improve memory? Does having friends improve mental health? These questions can be examined through controlled scientific experiments. This course will teach students the methods of statistics that are used for exploring data collected in experiments and for evaluating scientific hypotheses. Students will learn how to apply the core statistical tools used in science such as t-tests, ANOVA, regression, and Chi-square tests.
Pre-requisite: Statistics (GMAT1310) and Social Psychology (PSYC3320)

PSYC3316 Personality Psychology, Credit Hours: 3

This course provided basic concepts and issues in personality theory and research, approaches to personality description and assessment. This course facilitates students to examine the development and experience of an individual based on the perspectives of the various theories.

PSYC3325 Biopsychology, Credit Hours: 3

This course will give you an in-depth view of the field of clinical psychology, including assessment/diagnosis, interviewing, testing and the different therapies and research on them. It will also cover specialties (child clinical, health, clinical neuropsychology, and forensic psychology) and differentiate clinical from the other professions (social work, psychiatry, marriage and family therapy, counselling).

PSYC3326 Psychology of Entrepreneurship, Credit Hours: 3

The subject learns about the application of psychological concept of helping entrepreneurship organization to achieve success and sustainability in business world.

PSYC3322 Counseling Psychology, Credit Hours: 3

This course is an introductory class to Counseling Psychology. Students will learn about the history of the development of counseling, effective counseling processes, and counseling theories. Students will also learn to recognize the characteristics of a counselor who has integrity and upholds a professional code of ethics.

PSYC4328 Mental Health and Mental Wellness, Credit Hours: 3

Mental health and mental wellness learn about how a human being thinks, feels and act and how they can handle stress, relate to others and make healthy choices. Mental health and mental wellness is important concepts at every stage of lifespan.

PSYC4330 Community Development, Credit Hours: 3

This thematic internship program is a volunteer and humanitarian activity to help individuals develop awareness of social values in social life. Students are given the opportunity to be involved in various humanitarian activities, such as contributing in the fields of media and information literacy, education, the environment, tourism and the creative economy, as well as other social fields related to the field of psychology.

PSYC3314 Cognitive Development, Credit Hours: 3

Studies the human mind and learns about the processes of attention, perception, sleep, dream, memory, and storage, and higher order thinking that enables human beings to learn about the world.

PSYC4632 Senior Capstone (Skripsi & Jurnal), Credit Hours: 6

A culminating experience for majors involving a substantive project that demonstrates a synthesis of learning accumulated in the major, including broadly comprehensive knowledge of the discipline and its methodologies. Senior standing required. May be repeated: for a total of 6 units of credit. Senior capstone 1 is required to take senior capstone 2.

PSYC4305 Internship, Credit Hours: 3

This course is an internship program, where students will have the opportunity to apply the concepts, theories, and skills that they acquired during their studies. This internship program can be implemented in companies, agencies, and institutions both public and private, especially in positions related to psychology.

PSYC3319 Psychology of Leadership, Credit Hours: 3

Subject that studies human behavior and the environment that can help them define what an effective leader. Psychology of leadership will motivate students for developing an ideal type in her or himself to build leader's character, in a good fit with 21st century leaders typology.

FACULTY DIRECTORY

FACULTY	STUDY PROGRAM	NAMES	ACADEMIC DEGREES
Faculty of Business	Accounting	Andrey Hasiholan Pulungan	Bachelor of Economics in Accounting, Gadjah Mada University, Indonesia, 2003 Master of Commerce in Accounting, Australian National University, Australia, 2009
		Andriati Fitriningrum (F)	Bachelor in Political Science, Airlangga University, Indonesia, 1992 Magister Management in Financial Management, Gadjah Mada University, Indonesia, 1995 M.A. in Business, Macquarie University, Australia, 2009 Ph.D. in Accounting, Australian National University, Australia, 2015
		Bambang Setiono (A)	Bachelor of Accounting, State School of Accountancy (STAN), Indonesia, 1983 Master of Accounting from University of Denver, U.S.A, 1992 Ph.D. in Accounting and Finance from Manchester University, United Kingdom, 1996
		Luciana Haryono (A)	Bachelor in Accounting, Jenderal Soedirman University, Indonesia, 2001 Magister Management in Business Management, Prasetya Mulya Business School, Indonesia, 2009 Magister in Accounting, University of Indonesia, Indonesia, 2014
		Michael Hadylaya (A)	Bachelor of Law, Universitas Gajah Mada, Indonesia, 2011 Magister of Law, Universitas Gajah Mada, Indonesia, 2013
		Sri Maharsi, MSCIS	Master of Science in Computer Information System, Thailand, 2003 Sarjana Ekonomi, Universitas Kristen Petra, Indonesia, 1999
		Arnaldo Purba, Ph.D.	Doctor of Philosophy, The Australian National University, Australia, 2018 Master of Arts in International Relations, Waseda University, Japan, 2010 Magister Akuntansi, Universitas Indonesia, Indonesia, 2008 Sarjana Ekonomi, Universitas Indonesia, Indonesia, 2003

FACULTY	STUDY PROGRAM	NAMES	ACADEMIC DEGREES
Faculty of Business	Accounting	Kenny Fernando	Bachelor of Economics in Accounting, Bunda Mulia University, 2016 M.S.Ak. in Accounting, Universitas Indonesia, 2018
		Silvia Eka Putri, M.Ak.	Magister Akuntansi, Universitas Binus, Indonesia, 2021 Sarjana Ekonomi, Universitas President, Indonesia, 2014
		Wilson Tobing, Ph.D.	Doctor of Philosophy, University of Santo Tomas, Phillipines, 1991 Master of Science in Taxation, Universitas Indonesia, Indonesia, 2004 Sarjana Ekonomi, Universitas Indonesia, Indonesia, 1982
	Management	Bun Sucento (A)	Bachelor in Business Administration, Indonesian Institute of Management, Indonesia Master in Business Administration, Pittsburgh State University, United States, 1994 Master in Management, University of Dallas, United States, 1995
		Christian Pangaribuan	B.S. in Business Administration, Ohio State University, USA, 1997 M.B.A., University of New Haven, USA, 1999 Ph.D in Marketing, Bina Nusantara University, Jakarta, Indonesia 2021
		Muhril Ardiansyah	B.S. in Agronomy, Institut Pertanian Bogor, Indonesia M.S. in Agricultural Economics, Oklahoma State University, USA, 1993 Ph.D. in Agricultural Economics, Oklahoma State University, USA, 2002
		Sentot Basuki Prayitno	Bachelor of Industrial Engineering, Trisakti University, 1998 M.M in Management, PPM Graduate School of Management, 2000 Doctoral Program in Economics, Concentration in Marketing Science, Trisakti University (On Going, 1 st Semester)
		Tri Wismiarsi, Ph.D.	Bachelor of Forest Management, Institut Pertanian Bogor, 1988 M.Sc in International Marketing, University of Strathclyde, 1997 Ph.D in Philosophy, Monash University, 2006

FACULTY	STUDY PROGRAM	NAMES	ACADEMIC DEGREES
Faculty of Business	Management	Pananda Pasaribu	B.S. in Agribusiness, Bogor Agricultural University, Indonesia 2007 M.S.M. in Corporate Finance, the University of Indonesia, Indonesia 2009 M.Sc in Financial Forecasting and Investment, the University of Glasgow, United Kingdom 2011 Ph.D. in Finance, the University of Leeds, United Kingdom, 2015
		Wahyoe Soedarmono* Dean Faculty of Business	Bachelor of Science in Math, Universitas Negeri Surakarta, Indonesia, 2005 Master of Science in Economy, Univ. De La Rochelle, France, 2007 Ph.D. Finance and Banking, Univ. De Limoges, France, 2011
Faculty of Education	EED Med	Kartika Yulianti (A)	Bachelor of Education, State University of Jakarta, Indonesia, 1999 M.Sc in Education, Rijksuniversiteit Groningen, Netherlands, 2006 M.A in College of Education, Michigan State University, United States, 2013 Ph.D, Educational Sciences, Radboud University, Netherlands, 2019
	English Language Education	Adesti Komalasari (F)	B.S in English Education - Sanata Dharma University, Indonesia, 2007 M.S. in American Studies - Universitas Gadjah Mada, Indonesia, 2009
		Bakti Abdillah Putra (F)	S.H.Int. (Bachelor's Degree in International Relations), Universitas Padjadjaran, Indonesia, 2013 M.Int.Comm. (Master of International Communication), Macquarie University, Australia, 2018
		C I Wayan Eka Budiarta	B.Ed in English Education, Sanata Dharma, Indonesia, 2000 M.S. in Linguistics, Nanzan University, Japan, 2009 Dr. (Ph. D) in English Applied Linguistics, Atmajaya University, Indonesia
		Maria Risma Novianti	B.Ed in Bac English Education, Universitas Sanata Dharma, Indonesia, 201 M.A in American Studies, Universitas Gajah Mada, Indonesia, 2015

FACULTY	STUDY PROGRAM	NAMES	ACADEMIC DEGREES
Faculty of Education	English Language Education	Soepriyatna* Dean of Faculty of Education	S. Pd (B. Ed). in English Language Education, IKIP Bandung, Indonesia, 1989 M. Pd. (M. Ed) in English Language Education, UPI, Bandung, Indonesia, 2000 Dr. (Ph. D) in English Applied Linguistics, Atmajaya University, Indonesia, 2012
		Susilowaty	Bachelor of Economics, University of Indonesia, 1997 M.A in Teaching English to Speaker of Other Languages, Southern Illinois University, Carbondale, US, 2004
		Vera Syamsi	Bachelor of Education-English Department, Universitas Lampung 1992 Master of Humanities/Cultural Studies/English Literature, Universitas Indonesia 2003 Doctor of Humanities/Cultural Studies/English Literature, Universitas Indonesia 2019
		Julia Frances Lonan	B.A in Arts, Concordia University Wisconsin, 1996 M.A in Communication Studies, Management Communication Emerson College Boston, 1997
	English for Academic Purposes (EAP)	Zulia Ismailova	B.A in English and English Literature, National University of Uzbekistan, 2002 MA in Linguistics, California State University, 2009
		Annisa Pane	B.Ed in English Education, Sampoerna School of Education, 2013 M.A in Education-Innovation in Learning and Teaching, University of South Wales, 2020
	Mathematics Education	Deshinta Puspa Ayu	B.Ed. in Mathematics Education, STKIP Kebangkitan Nasional Jakarta, Indonesia, 2014 M.Ed in Mathematics Education, Universitas Sebelas Maret, Indonesia, 2016
		Desyarti Safarini	B.Ed in Mathematics Education - Universitas Negeri Jakarta, Indonesia, 2007 M.S. in Applied Mathematics, Universitas Bina Nusantara, Indonesia, 2009
		Dhitta Puti Sarasvati R. (A)	Bachelor of Engineering (B.Eng) in Mechanical Engineering, institute Technology of Bandung, Indonesia, 2007 Master of Education (M.Ed) in Mathematics Education, University of Bristol, United Kingdom, 2009

FACULTY	STUDY PROGRAM	NAMES	ACADEMIC DEGREES
Faculty of Education	Mathematics Education	Faradillah Hariani	B.Ed in Mathematics Education, Universitas Negeri Surabaya, Indonesia, 2013 M.S.in Mathematical Modelling, University of Birmingham, United Kingdom, 2015
		Namirah Fatmanissa (F)	B.Ed. in Mathematics Education, Sampoerna School of Education, Indonesia, 2013 M.Ed. in Mathematics Education, Universitas Pendidikan Indonesia, Indonesia, 2018
Faculty of Engineering & Technology	Computer Science	Media Anugerah Ayu	Bachelor in Agro Industrial Technology (Ir.), IPB, Indonesia, 1991 M.S. in Industrial Engineering and Management, Asian Institute of Technology, Thailand, 1994 Ph. D in Information Science and Engineering, Australian National University, Australia, 2007
		Muhammad Agni Catur Bhakti	B.Eng. in Electrical Engineering (Computer Engineering concentration), University of Indonesia, 2000 M.S. in Information Technology, Petronas University of Technology, Malaysia, 2008 Ph. D. in Information Technology, Petronas University of Technology, Malaysia, 2011
		Teddy Mantoro	B.S. in Computer Science, University of Budi Luhur, Indonesia, 1989 M,S. in Computer Science, Asian Institute of Technology, Thailand, 1994 Ph.D in Computer Science, The Australian National University, Australia, 2005
		Eko Sulisty	Bachelor of Computer Science, University of Indonesia, 2009. Master of Information Technology, University of Indonesia, 2013.
	Industrial Engineering	Ammar M. Aamer (A)	B.S. in Industrial Engineering, The University of Tennessee, Knoxville-USA, 1998 M.S. in Industrial Engineering, The University of Tennessee, Knoxville-USA, 1999 Ph.D. in Industrial & Information Engineering, The University of Tennessee, Knoxville-USA, 2005

FACULTY	STUDY PROGRAM	NAMES	ACADEMIC DEGREES
Faculty of Engineering & Technology	Industrial Engineering	Nurul Retno Nurwulan (F)	Bachelor in Industrial Engineering, Institut Teknologi Bandung, Indonesia, Indonesia, 2007 Master of Business Administration in Industrial Management, National Taiwan University of Science and Technology, 2014 Master of Engineering in Industrial Engineering, Institut Teknologi Bandung, Indonesia, 2014 Ph.D. in Industrial Management, National Taiwan University of Science and Technology, 2018.
		Sri Susilowati Islam	Bachelor of Industrial Engineering, Hasanuddin University, Indonesia, 2009 Master of Industrial Engineering and Management, Bandung Institute of Technology, Indonesia, 2014
		Surya Danusaputro Liman* Dean of Faculty of Engineering & Technology	B.S.I.S.E in Industrial and Systems Engineering, The University of Florida, 1986 M.E. in Engineering, The University of Florida, 1987 Ph.D. in Engineering, The University of Florida, 1991
		Tika Endah Lestari (F)	Bachelor of Education in Mathematics Education, Indonesia University of Education, Indonesia, 2011 Master of Science in Mathematics, Institut Teknologi Bandung, Indonesia, 2014
		Filscha Nurprihatin, M.T.	B.Sc in Industrial Engineering, Universitas Islam Indonesia, 2012 M.Sc in Industrial Engineering, Institut Teknologi Bandung, 2015
		Idrus Husin Belfaqih (F)	Bachelor of Education in Physics Education, Jakarta State University, Indonesia, 2016 Master of Science in Physics, Institute Technology Bandung, Indonesia, 2018
		Anak Agung Ngurah Perwira Redi, PhD	B.Sc in Informatics, Institut Teknologi Sepuluh Nopember, 2011 MBA in Business Administration, National Taiwan Univeraity of Science and Technology, 2014 Ph.D. of Philosophy, National Taiwan University of Science and Technology, 2017

FACULTY	STUDY PROGRAM	NAMES	ACADEMIC DEGREES
Faculty of Engineering & Technology	Information System	Wandy	Diploma (A.Md.), Universitas Gunadarma, Indonesia, 1999 M.Cs. In Computer Science, University of Wollongong, Australia, 2001
		Iwan Setiawan (F)	B.S. in Biochemistry, Saginaw Valley State University , US, 2007 Ph.D in in chemistry, Michigan State University , US, 2014
		Muhammad Raусyаn Fikri (F)	Bachelor in Electronics and Instrumentations, Universitas Gajah Mada, Indonesia, 1992 Master in Systems and Control Engineering, Tokyo Institute of Technology, Japan, 2018
		Rafie Djajasoepena	B.S in Computer Science, Mercu Buana University, 2011 M.T.I in Information Technology, Swiss German University, 2018
		Putri Yuni Lestari (F)	Bachelor of Science in Computer Science, Bina Nusantara University, Indonesia, 2014 Master of Science in Management Information Systems, Bina Nusantara University, 2019
		Ery Eryanto (F)	Bachelor of Science in Information Systems, Universitas Telkom, Indonesia, 2018 Master of Management in Information Systems, Universitas Bina Nusantara, Indonesia, 2020
		Ariana Tulus Purnomo	B.Tech in Electrical Engineering, Institut Teknologi Bandung, 2015 M.Tech in Electrical Engineering, Institut Teknologi Bandung, 2017 M.Eng in Engineering, Pukyong National University, 2017 Ph.D. in Electronic & Computer Engineering, National Taiwan University of Science & Technology, Taiwan, 2022
	Mechanical Engineering	Aditiya Harjon (F)	B.S in Mechanical Engineering (Hons.), Universiti Tenaga Nasional (UNITEN), Malaysia, 2014 M.Phil in Mechanical Engineering, The University of Melbourne, Australia, 2018

FACULTY	STUDY PROGRAM	NAMES	ACADEMIC DEGREES
Faculty of Engineering & Technology	Mechanical Engineering	Ir. Djati Wibowo, Ph.D (F)	B.Eng. in Mechanical Engineering, Institut Teknologi Bandung, Indonesia, 2003 M.Eng. In Mechanical Engineering, Nanyang Technological University, Indonesia, 2010 Ph.D. in Mechanical Engineering, National University of Singapore, Singapore, 2020
		Farid Triawan	Bachelor of Engineering, Institut Teknologi Bandung, Indonesia, 2005 Master of Engineering, Tokyo Insitute of Technology, Japan, 2009 Dr. Eng, Mechanics of Material, Tokyo Institute of Technology, 2012
		Ignatius Budi Sutanto Hadisujoto	B.S. in Mechanical Engineering, Tarumanagara University, Indonesia, 1996 M.S. in Mechanical Engineering, The University of Texas at Austin, USA, 2005 Ph.D. in Mechanical Engineering, The University of Texas at Austin, USA, 2013
		Kushendarsyah Saptaji (F)	B.Eng. in Mining Engineering, Institut Teknologi Bandung, Indonesia, 2002 M.Sc. in Mechanics and Processing Materials, Nanyang Technological University, Singapore, 2007 Ph.D. in Mechanical and Aerospace Engineering, Nanyang Technological University, Singapore, 2012
	Visual Communication Design	Arya Harditya (F)	B.A. in Multimedia Design, Curtin University of Technology, AU, 2006 M.A. in Digital Media, University of Sussex, United Kingdom, 2015
		Rachmat Arsyadi	B.A. in Multimedia Design, Curtin University of Technology, AU, 2006 M.A. in Digital Media, University of Sussex, United Kingdom, 2015
		Santo Tjhin (F)	Bachelor of Art, Tarumanegara University, Indonesia, 2003 Master of Management in Entrepreneurship, Universitas Trisakti, Indonesia, 2011 Master of Design, Universitas Trisakti, Indonesia, 2016
		Tombak Matahari (F)	Bachelor of Multimedia, Monash University, Melbourne - Australia, 2002 Master of Design, Art and Design Faculty , Bandung Institute of Technology, 2006

FACULTY	STUDY PROGRAM	NAMES	ACADEMIC DEGREES
